Comments:

Stand 42's objective is planted RP but the Rx also accepts an oak component. The adjacent stand 43 was cut at the same time but has a natural regen objective. If natural regen fails in stand 43, the back-up plan is to plant it to RP along with stand 42. If stand 43 is added to stand 42's cultivation treatments, note that there are three small bogs to the northwest of stand 43.

PROOFING COMMENTS

Rec: Snowmobile Trail, ORV Route, baseball fields

Water: None w/in 500 ft unless stand 43 is added

HAL: None known

MNFI: Within a large EMR poly, but not on EMR-managed lands
