

Main Branch Black River The Rock

Fish Species

Brook Trout

Species Description

Brook trout are the primary trout species encountered at this location.

Geographic Coordinates

Lat:45.11755 / Long:-84.3857

Noteworthy

This property is a recent addition to the state forest. A cabin and walk bridge once sat next to the river here, but the site has been restored. Stop by the Rock which has an engraving on it as a tribute to the river. This is a camping location for some locals so please keep it clean and be aware of those using it. The river here is typical for this reach with some gradient and plenty of gravel and cobble in the river holding brook trout typically ranging from 6-9 inches.

Fishing Regulations

This site on the Main Branch of the Black River is designated as Gear Restricted. Please refer to the Inland Trout and Salmon Regulations in the current Michigan Fishing Guide.

Directions to Site

Continue north approximately 0.4 mile past the access trail for the previous site, Chandler Dam Road Access. Turn on the trail road on left (west) and follow to the access site.
