

## ***Boardman River Bitner Road***

---

### ***Fish Species***

Brook Trout; Brown Trout; Steelhead

### ***Species Description***

The Boardman River fish community in this location is fairly diverse. Lower numbers of brook trout are found in this reach below where Sabin Dam used to be, but large brown trout that move in and out of Boardman Lake frequent this stretch, as well as steelhead, bass, and walleye in the spring time. No stocking occurs in this section of the river and the trout populations are entirely dependent upon natural reproduction.

### ***Geographic Coordinates***

Lat:44.708009 / Long:-85.622717

### ***Noteworthy***

This section of the Boardman River is a Type 4 trout stream from Bitner Road to the mouth; prior to that the river is a Type 1 trout stream. The river here is a gravel bottom and very wide; a great spot for beginning casters of all gear types!

### ***Fishing Regulations***

This section of the Boardman River is divided with two different fishing regulations. The Boardman River from Bitner Road to the mouth is designated a Type 4 trout stream while before that point it is a designated Type 1 trout stream. Please refer to the Inland Trout and Salmon Stream Regulations in the current Michigan Fishing Guide.
