

# Compartment Review Presentation

Gaylord Forest Management Unit

Compartment 52023

Entry Year 2026

Acreage: 1,105

County Otsego

Management Area: High Sand Plains

---

**Stand Examiner:** Zach Crew

**Legal Description:**

T30N R01W sections, 34, 35, and 36

**Identified Planning Goals:**

To provide for the protection, integrated management and responsible use of a healthy, productive, and undiminished forest resource base for the social, recreational, environmental, and economic benefit of the State of Michigan

**Soil and topography:**

Graycalm and Lindquist sands dominate the southern portion of the compartment. Blue Lake and Mancelona loamy sands become prevalent as you go north and west in the compartment.

**Ownership Patterns, Development, and Land Use in and Around the Compartment:**

There is heavy Oil and Gas activity in this compartment and the surrounding area. State land accounts for roughly 60 percent of the 3 sections. There is heavy recreational use around Big Bear Lake and via the snowmobile and ORV trails. The majority of private ownership in the area is centered around Big Bear Lake.

**Unique Natural Features:**

Big Bear Lake and the associated recreational use.

**Archeological, Historical, and Cultural Features:**

There are known concerns within the compartment. All proposed management activities have taken these concerns into consideration.

**Special Management Designations or Considerations:**

Two SCA's in this compartment surround both Bear Lake Campgrounds.

**Watershed and Fisheries Considerations:**

This compartment contains a portion of Big Bear Lake and is adjacent to Little Bear Lakes. These lakes have cool- and warmwater fish communities. Big Bear Lake is stocked with walleye and Great Lakes-strain muskellunge, and has a public access at the State Forest Campground. Little Bear Lake has an unimproved, sandy access, and is fished primarily by local residents. The prescribed management actions are appropriate for the protection of these waterbodies.

**Wildlife Habitat Considerations:**

Treatments in this compartment will maintain age class diversity in aspen and oak while creating early successional habitat benefiting deer, grouse, and woodcock. Clumps of mature oak will be left in these treatments for mast production for deer, wild turkey and grouse.

**Mineral Resource and Development Concerns and/or Restrictions**

No known active sand/gravel pits exist in the area. There is good potential for sand & gravel within the compartment on the uplands, but development could be inhibited by oil & gas infrastructure. In addition, demand for aggregate in the area may be low, primarily limited to the need for local road maintenance. Nearly all State-owned mineral rights in the compartment are currently leased and held by production for Antrim Shale gas. The Antrim Shale gas play is generally in decline in the northern LP, and the trend toward plugging of wells is expected to increase in the coming years. The compartment is on the southern edge of the Silurian reef trend, a highly productive oil & gas play. The nearest reef well is one mile north, and potential for reef discoveries beneath the compartment is considered low. There is no known potential for metallic minerals in this part of the state.

**Vehicle Access:**

Good Access to the compartment via County Roads and Oil & Gas development roads.

**Survey Needs:**

None

**Recreational Facilities and Opportunities:**

Big Bear Lake Campground, and Big Bear Lake Point Campground and associated recreational uses. Atlanta-Gaylord Snowmobile connector and ORV trail run through the compartment.

**Fire Protection:**

Most stands in this compartment do not exhibit characteristics that would be conducive to large scale fire potential. However there is still the potential for smaller localized fires in the area, specially after any red pine plantings.

**Additional Compartment Information:**

**The following reports from the Inventory are attached:**

- Total Acres by Cover Type and Age Class**
- Cover Type by Harvest Method**
- Proposed Treatments – No Limiting Factors**
- Proposed Treatments – With Limiting Factors**
- Stand Details (Forested and Nonforested)**
- Dedicated and Proposed Special Conservation Areas**
- Site Condition Details**

**The following information is displayed, where pertinent, on the attached compartment maps:**

- Base feature information, stand boundaries, cover types, and numbers**
- Proposed treatments**
- Site condition boundaries**
- Details on the road access system**

<b>Total</b>	<b>208</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>147</b>	<b>0</b>	<b>0</b>	<b>355</b>

S t a n d	Treatment Name	Acres	Stand CoverType	Size Density	Stand Age	BA Range	Treatment Type	Treatment Method	Cover Type Objective	Age Structure	Habitat Cut
-----------------------	----------------	-------	-----------------	--------------	-----------	----------	----------------	------------------	----------------------	---------------	-------------

**Proposed Treatments:**

22	52023022-Cut	22.7	42110 - Planted Red Pine	Poletimber Well	61	141-170	Harvest	Crown Thinning	4211 - Planted Red Pine	Even-Aged	No
----	--------------	------	--------------------------	-----------------	----	---------	---------	----------------	-------------------------	-----------	----

Prescription Thin this portion of the stand with a target residual BA of 120-140. In areas where desirable advanced oak regen dominates and the BA is under 120 thin stand with a target residual BA of 60-80 to allow advanced oak regen to continue to develop.

Next Step  
Treatments:

Acceptable  
Regen:

Other Include appropriate trail protection specs.

Comment: Oak wilt specs apply no exceptions.

Site Condition

Proposed Start Date: 10/1 /2025

22	52023022-Cut-Overstory	10.8	42110 - Planted Red Pine	Poletimber Well	61	141-170	Harvest	Overstory Removal	4199 - Other Mixed Upland Deciduous	Even-Aged	No
----	------------------------	------	--------------------------	-----------------	----	---------	---------	-------------------	-------------------------------------	-----------	----

Prescription Remove all overstory red pine greater than 8" at dbh to allow for continued development of advanced regen in the understory.

Specs:

Next Step Monitoring, Natural Regen (Re-Inventory)

Treatments:

Acceptable A mix of upland deciduous species including aspen, red maple, oak, and cherry that meets minimum stocking criteria.

Regen:

Other Include appropriate trail protection specs, be sure to only allow cut to length harvesting in order to protect the advanced regen as much as possible.

Comment: Oak wilt specs apply no exceptions.

Site Condition

Proposed Start Date: 10/1 /2025

23	52023023-Cut	29.3	4130 - Aspen	Poletimber Well	45	81-110	Harvest	Clearcut with Retention	413 - Aspen	Even-Aged	No
----	--------------	------	--------------	-----------------	----	--------	---------	-------------------------	-------------	-----------	----

Prescription Final harvest stand. Standard area retention. Retention pockets should be between .25 to .5 acre and scattered around the stand. A minimum 3 retention islands will be necessary. Focus retention around areas with desirable advanced regen such as oak and white pine.

Specs:

Next Step Monitoring, Natural Regen (Re-Inventory)

Treatments:

Acceptable A mix of species dominated by aspen that meets minimum stocking criteria.

Regen:

Other Include appropriate trail protection specs.

Comment: Include oak wilt specs with exceptions

Include drumming log specs.

Site Condition

Proposed Start Date: 10/1 /2025

S  
t  
a  
n

Treatment Name	Acres	Stand CoverType	Size Density	Stand Age	BA Range	Treatment Type	Treatment Method	Cover Type Objective	Age Structure	Habitat Cut
----------------	-------	-----------------	--------------	-----------	----------	----------------	------------------	----------------------	---------------	-------------

<b>38</b>	<b>52023038-Cut</b>	30.4	4199 - Other Mixed Upland Deciduous	Sawtimber Well	105	51-80	Harvest	Clearcut with Retention	413 - Aspen	Even-Aged	No
-----------	---------------------	------	-------------------------------------	----------------	-----	-------	---------	-------------------------	-------------	-----------	----

Prescription Final harvest stand, focus retention in 1/2 acre pockets around recreation trails in the stand. Protect understory white pine. Do not cut white oak. Mark one clump of 3 to 5 large crowned oak to leave at a rate of 1 per 3 acres.

Next Step Monitoring, Natural Regen (Re-Inventory)  
Treatments:

Acceptable Regen: A mix of species that is at least 5% oak but dominated by aspen.

Other Comment: Include appropriate trail protection specs

Include oak wilt no exceptions specs

Include 4" spec to protect advanced regen

Include processor cut only spec.

Include drumming log specs.

Site Condition

Proposed Start Date: 10/1 /2025

<b>40</b>	<b>52023040-Cut</b>	16.7	4131 - Aspen, Oak	Poletimber Well	37	51-80	Harvest	Clearcut with Retention	413 - Aspen	Even-Aged	No
-----------	---------------------	------	-------------------	-----------------	----	-------	---------	-------------------------	-------------	-----------	----

Prescription Final harvest stand. Do not cut pine. Retention has already been coded in MIFI (see site condition layer). Mark one clump of 3-5 large crowned oak to leave at a rate of 1 per 3 acres.

Next Step Monitoring, Natural Regen (Intermediate)  
Treatments:

Acceptable Regen: A mix of deciduous species dominated by aspen and at least 5% oak.

Other Comment: Include appropriate trail protection specs.

Include 4" spec to protect advanced regen

Utilize drumming log specs

Oak wilt specs apply no exceptions

Include processor cut only spec to help protect advanced regen.

Site Condition

Proposed Start Date: 10/1 /2025

<b>60</b>	<b>52023060-Cut</b>	20.5	42110 - Planted Red Pine	Sawtimber Well	61	141-170	Harvest	Crown Thinning	4211 - Planted Red Pine	Even-Aged	No
-----------	---------------------	------	--------------------------	----------------	----	---------	---------	----------------	-------------------------	-----------	----

Prescription Mark to cut red pine. In heavily stocked areas (greater than 160 BA) target residual should be 120 BA. In areas with lesser stocking with a well developed understory of desirable species (oak/aspen/maple) target residual should be 80 BA. Include appropriate trail protection specs.

Include oak wilt specs with no exceptions.

Next Step Treatments:

Acceptable Regen:

Other Comment: The purpose of this cut is to begin to open the stand canopy to allow sunlight to simulate understory recruitment of desirable species (oak/aspen/pine). We will continue to gradually remove the red pine through successive YOEs in order to promote a mixed deciduous stand

Site Condition

Proposed Start Date: 10/1 /2025

S

d

Treatment Name	Acres	Stand CoverType	Size Density	Stand Age	BA Range	Treatment Type	Treatment Method	Cover Type Objective	Age Structure	Habitat Cut
----------------	-------	-----------------	--------------	-----------	----------	----------------	------------------	----------------------	---------------	-------------

<b>62</b>	<b>52023062-Cut</b>	10.0	42111 - Planted Red Pine, Mixed Deciduous	Sawtimber Well	61	111- 140	Harvest	Crown Thinning	4211 - Planted Red Pine	Even-Aged	No
-----------	---------------------	------	---	-------------------	----	-------------	---------	----------------	----------------------------	-----------	----

Prescription Mark to cut red pine. Where it is dominant target a residual BA of 100. Where the red pine is suppressed and over topped by other species  
Specs: remove it. Only mark species other than red pine to allow for equipment operations. Old rows do exist in this stand but are squirrely, may need to mark additional trees to make operations viable. No tree length skidding is to be allowed. Encourage cut in snow off conditions.

Include oak wilt specs no exceptions.

Next Step  
Treatments:

Acceptable  
Regen:

Other The purpose of this cut is to begin to open the stand canopy to allow sunlight to simulate understory recruitment of desirable species  
Comment: (oak/aspens/pine). We will continue to gradually remove the red pine through successive YOEs in order to promote a mixed deciduous stand

Site Condition

Proposed Start Date: 10/1 /2025

<b>63</b>	<b>52023063-Cut</b>	13.5	4191 - Mixed Upland Deciduous with Conifer	Sawtimber Well	84	111- 140	Harvest	Clearcut with Retention	4199 - Other Mixed Upland Deciduous	Even-Aged	No
-----------	---------------------	------	--	-------------------	----	-------------	---------	----------------------------	---	-----------	----

Prescription Final harvest stand. Mark one clump of 3 to 5 large crowned oak to leave at a rate of 1 per 3 acres. Include two 1/4 to 1/2 acre retention  
Specs: island centered on the hiking trail. Incorporate some red pine into these retention islands where possible.

Next Step Monitoring, Natural Regen (Re-Inventory)  
Treatments:

Acceptable A mix of mainly deciduous species dominated by aspen but that contains at least 10% oak.  
Regen:

Other Include appropriate trail protection specs

Comment: Include oak wilt specs with no exceptions

Include 4" spec to protect advanced regen.

Include drumming log specs.

Site Condition

Proposed Start Date: 10/1 /2025

<b>64</b>	<b>52023064-Cut</b>	7.7	42110 - Planted Red Pine	Poetimber Well	61	111- 140	Harvest	Crown Thinning	4211 - Planted Red Pine	Even-Aged	No
-----------	---------------------	-----	-----------------------------	-------------------	----	-------------	---------	----------------	----------------------------	-----------	----

Prescription Mark to cut red pine with a target residual BA of 100. Only cut other species if they interfere with equipment operations. Rows are very  
Specs: squirrely so may need to mark additional trees for forwarding access.

Next Step  
Treatments:

Acceptable  
Regen:

Other The purpose of this cut is to begin to open the stand canopy to allow sunlight to simulate understory recruitment of desirable species  
Comment: (oak/aspens/pine). We will continue to gradually remove the red pine through successive YOEs in order to promote a mixed deciduous stand. No tree length skidding is to be allowed. Encourage cut in snow off conditions. Include Oak wilt specs no exceptions.

Site Condition

Proposed Start Date: 10/1 /2025

### Report 6 – EXISTING SPECIAL CONSERVATION AREA DETAILS

\* This is a list of SCA's for this compartment along with a 1/4 mile buffer surrounding the compartment. Refer to the Special Conservation Area Map for locations of the below listed Conservation Areas.

ERA = Ecological Reference Area  
HCVA = High Conservation Value Area  
SCA = Special Conservation Area

<b>Conservation Area</b>	<b>Type</b>	<b>Description</b>

Stand	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	Managed Site	General Comments
-------	--------------------	--------------	-------	-----------	----------	--------------	------------------

**38** 4199 - Other Mixed Upland Deciduous Sawtimber Well 32.3 105 51-80 N/A

Species thin completed 10/30/97, all species cut except for oak and pine. Compared to adjacent stands that were left alone, the species thin didn't accomplish much silviculturally in this stand, aspen and red maple are borderline merchantable, while Oak is over mature and is unlikely to sprout if harvested.

Canopy Species	% Cover	Size Class	DBH	Age	Sub-Canopy Species	Density	Avg. Height	Size

<b>74</b>	4199 - Other Mixed Upland Deciduous	Sawtimber Well	54.2	96	81-110	N/A	Species thin conducted in 1997, all species removed except for oak and pine. Portions of the stand had all aspen and red maple removed in 1988 but this has all blended together over the last 40 years and is hard to tell the difference. Didn't do much to help the stand silviculturally, aspen and red maple are still sub merchantable in spots and suppressed in others, and oak is over mature and unlikely to sprout if harvested.			
Canopy Species		% Cover	Size Class	DBH	Age	Sub-Canopy Species		Density	Avg. Height	Size
Red Maple		15	Pole/Sapling	5		Red Maple		Low	< 5 feet	Sapling
White Pine		10	Log	12		Red Oak		Trace	< 5 feet	Sapling
Red Oak		52	Log/XLog	14	96	White Pine		Low	Variable	Sapling
Bigtooth Aspen		20	Pole	6	27	Hazelnut (Spp.)		Trace	5 - 10 feet	Tall Shrub
White Oak		3	Log	12		Serviceberry (Juneberry)		Trace	10 - 20 feet	Sapling
						Red Pine		Trace	5 - 10 feet	Sapling

<b>100</b>	4119 - Mixed Northern Hardwoods	Poletimber Well	46.1	79	111-140	N/A	Selection harvest in stand completed in 2007. Northern hardwood stand, amount of oak gradually increases as you head south. Understory dominated by beech regen post harvest. Common flush of year old hard maple seedlings scattered throughout (6" or less).			
Canopy Species		% Cover	Size Class	DBH	Age	Sub-Canopy Species		Density	Avg. Height	Size
Bigtooth Aspen		2	Log	14		Beech		High	10 - 20 feet	Sapling
Basswood		10	Log	12		Ironwood		Low	5 - 10 feet	Sapling
Quaking Aspen		3	Log	14		Sugar Maple		Low	< 5 feet	Sapling
Beech		20	Pole/Log	8		Red Maple		Low	5 - 10 feet	Sapling
Sugar Maple		30	Pole/Log	9	79					
Red Oak		15	Log	12	97					
Red Maple		20	Pole/Log	9
