Comments:	Do not trench roads, gas pads or the ORV Trail. Stands have low slash and stumps. Stands will need to be rollerchopped and sprayed. Stand 37 in compartment 73 was 139 years old with perched large diameter stumps cut in winter 2021. This is the only stand that didn't have tops chipped. All other stands were cut in spring-summer 2018. Stands 37, 40, and 79 in compartment 51 were previous failed seed-tree harvests that are now clearcut and have larger saplings to chop. Terrain is flat. Some access rds closed. Adjacent plantings were merged.
