| Comments: | Clearcut oak stand that was species thinned in 2000. Do not trench roads, gas pads, pipelines, or the Equestrian Trails. Terrain is rolling. Tops in north half were chipped and overly processed in the south half. North half of stand will probably need to be rollerchopped first depending on timing of prep work. There are many wells and pipelines near the planting area. Clearcut completion date- 4/6/21 south half, 8/27/20 north half. Severe red maple and other deciduous competition is expected. | | |
