Comments: Stand 36 has some woody debris and high stumps due to large diameter white pine. Most of the large trimmings were pushed to the perimeter of the stand. Stand 42 left all white pine and there are patches of sapling/pole to plant around. The snowmobile trail reroute was constructed within the south edge of stand 42. Stand 42's narrow shape, residual WP, and snow trail corridor doesn't leave much room for planting.
