Comments: Mature to overmature JP w/ RP-NPO was clearcut with retention. The north part of the harvest (stand 3) was trenched in 2022 (C72-896) & will be planted to RP in 2024. The south part (stand 84) had a natural regen objective with backup planting plan. Nat regen in the east half of stand 84 failed, so that area was split off as stand 89 and will be trenched and planted to RP under FTP C72-946.
