ACTIVITY TRACKING

Coverture Objective: Planted Red Pine	Acres: 113
Approved Methods: Trench and plant RP at standard spacing. Delineate and trench/plant around areas of desirable regen (note the Rx only spec'd to focus retention to protect oak & RP regen). Leave open the existing mapped roads within the planting area. Additional treatments may include chopping and herbicide.	
Timbersale number: 72-016-16	
Sale admin staff: Kubitskey	
Harvesting completed by: Jan 2022	
Contract TCR date: 03/10/2022	
Comments: Sale harvested under contract 72-016-16 Williams Jack Pine. Was a fairly scrubby site with moderate to full jack pine stocking. Understory had patchy Oak and Cherry cover. Site was chipped and very clean. Low stumps and slash. Flat terrain. A fuel break will be maintained along the west & south sides of the planting area. Do NOT trench or plant within 5 chains of Stickfort or Lyle Roads.
