ACTIVITY TRACKING	

Covertypes Objective: Planted Red Pine	Acres: 35
Approved Methods: Trench and plant RP. Additional treatments may include chopping, herbicide spraying, and pre-commercial thinning. Protect mapped open roads & utility corridors.	
Timbersale number: 72-046-21	
Sale admin staff: Price	
Harvesting completed by: Summer 2022	
Contract TCR date: 04/06/2023	
Comments: Sale was whole-tree harvested & chipped. The FTP area has approximately 50% coverage in dense aspen-oak-RM regen less than 2" DBH that was not cut during the harvest. That material will need to be roller-chopped or mulched before trenching.
