ACTIVITY TRACKING

Covertyp Objective: Mixed natural pine	Acres: 50
Approved Methods: Scarify the site using DNR trencher. Avoid areas with higher BAs. Protect the horse trail. There is oak in the stand so no operations during the oak wilt period.	
Timbersale number: 53-012-17-01	
Sale admin staff: Greg Rekowski	
Harvesting completed by: Nov '19-Dec '20, Biewer	
Contract TCR date:	
Comments: Access provided by Sturgeon Valley Road. A small state road leads to an open field near the center of the FTP area and can be used to stage equipment. BAs average 30-40 square feet with some higher BAs along the east side. Terrain is flat in the west half, rolling in the east half. Regeneration is limited due to heavy browse. Tops were chipped but it was not a "clean" job and there are still some areas where slash remains. Occasional high stumps are present. Three interior retention pockets in the east half.
