1965 – R. Jewell & B. Humphrey, USFS land corner record, found brass monument, set red topped cedar post.
1981 – Norman C. Caldwell, RLS #12018, survey recorded in L3, Pg 310, corner shown, no witnesses stated.

B. Description of corner evidence found and/or method applied in restoring or reestablishing corner:

G-7; Corner Common to Sections 15, 16, 21 & 22, T26N, R3E
Found GLO 6" concrete monument with brass tablet 25' East of trail road along power line.
To Corner F7: 2648.34'(M) 2649.24'(Veal) To Corner G6: 2591.38'(M) 2595.12'(Veal)
Face of wood post with location tag East 1.0'
Witnesses 1-6 not found.
GLO 6" concrete monument with brass tablet is accepted as a careful and faithful reestablishment of the position of the original corner.

C. Description of monument for corner and accessories established to perpetuate locating the position of the corner:

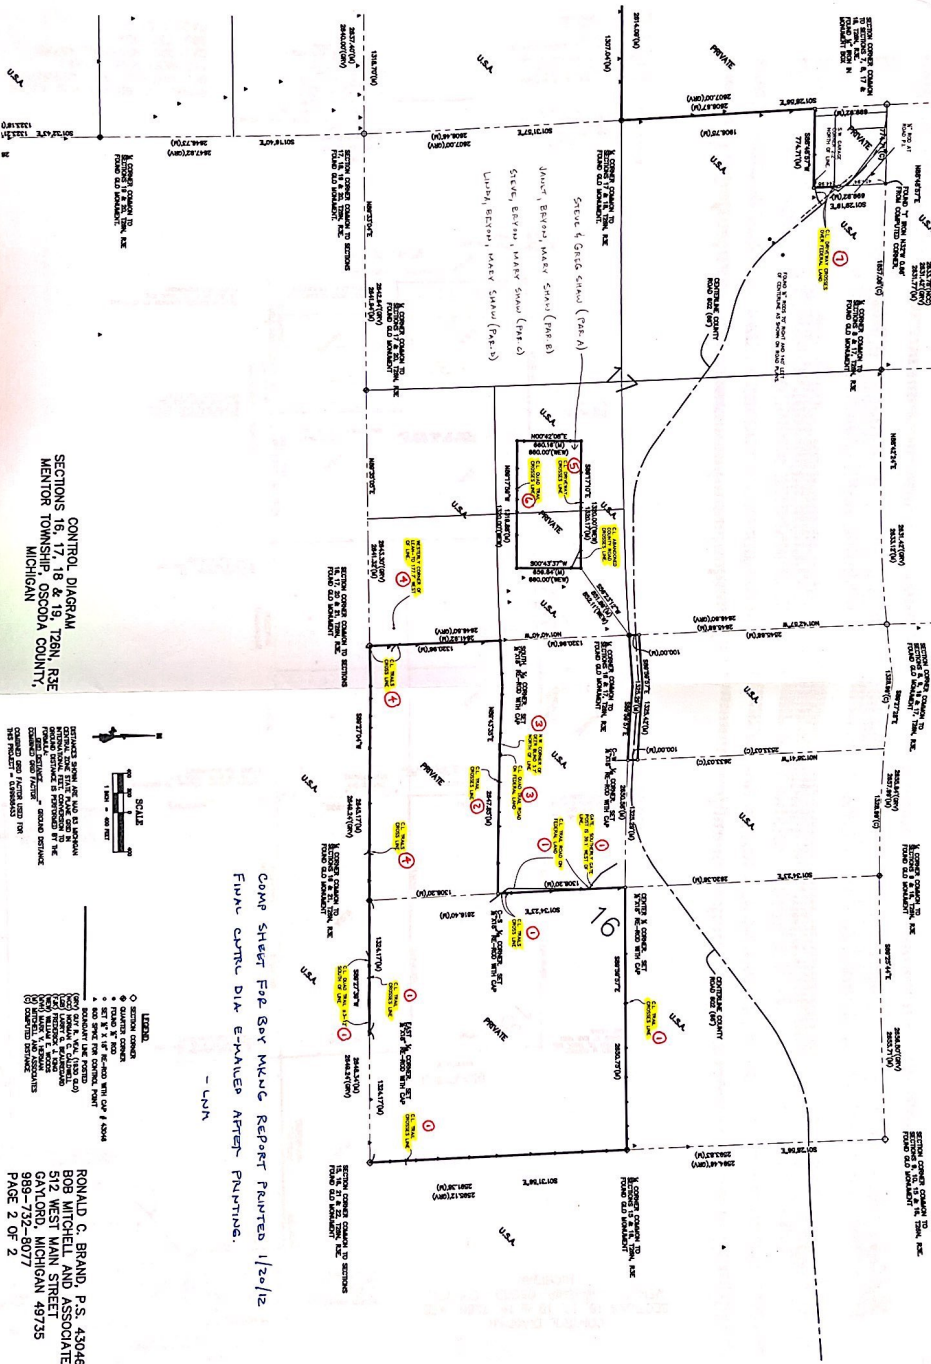

G-7; Corner Common to Sections 15, 16, 21 & 22, T26N, R3E
GLO 6" concrete monument with brass tablet.
Set ½" x 18" re-rod on North edge of monument to provide magnetic attraction.
Set 60d spike in N.W. side of 28" Red Pine N44°E 85.93'
Set 60d spike in N. side of 12" White Pine S65°E 34.13'
Set 60d spike in E. side of 11" White Pine S15°W 39.72'
Set 60d spike in W. side of 12" White Pine N18°W 34.93'

REPORT OF SURVEY

Bob Mitchell and Associates was contracted by the United States Forest Service to perform property line surveys between federal land and private land in Sections 16, 17, 18 & 19 Town 26 North, Range 3 East, Mentor Township, Oscoda County, Michigan.

GPS CONTROL MEASUREMENTS:

Michigan Central Zone, NAD83, State Plane Coordinates and measurements from a previous project in Section 8, T26N, R3E were accepted and used for this project. Specifically, points 1, 4, 6, 7, 8, 9, 23 and 24, are shown on the control diagram.

Point 24 was used as a RTK base station and coordinates were established for Point 301 (the $\frac{1}{4}$ corner common to Sections 16 & 17). Point 301 was then used as a RTK base station to extend control to points 302, 303, 304, 305 & 306. Static GPS data collected while at point 301 was then submitted to OPUS. The OPUS derived coordinates for point 301 were N37°W 0.045' from the previously established RTK coordinates. To limit the propagation of error throughout the project the decision was made to use the OPUS derived coordinates for point 301. Consequently the coordinates for points 301-306 were all translated by this amount.

During the course of the project point 306 was found to have been removed by others. This control point was re-established by RTK measurements from point 301 on 11/01/2011. RTK measurements to Points 100 and 116 were taken on that day as well.

Coordinates for Point 307 were established by 30 minute static GPS observation on 11/29/2011.

CONTROL AND PROPERTY LINE MEASUREMENTS:

Control and property line measurements were completed from previously established points in a series of closed loop ground traverses. The least squares analysis program, Cadastral Measurement Management (CMM), was used to evaluate and adjust measurements along the following lines:

- The East line of Section 19
- The South $\frac{1}{16}$ line of Section 19 from the South $\frac{1}{16}$ corner to Southeast $\frac{1}{16}$ corner.
- The East $\frac{1}{16}$ line of Section 19 from the Southeast $\frac{1}{16}$ corner to East $\frac{1}{16}$ corner.
- The South line of Section 19 from East $\frac{1}{16}$ corner to South $\frac{1}{4}$ corner.
- The North-South $\frac{1}{4}$ line of Section 19.
- The South line of Section 18 from the South $\frac{1}{4}$ corner to Southeast section corner.
- The East line of Section 18.
- The East $\frac{1}{16}$ line of Section 18 from the East $\frac{1}{16}$ corner to Center-East $\frac{1}{16}$ corner.
- The East-West $\frac{1}{4}$ line of Section 18 from the Center $\frac{1}{4}$ corner to the East $\frac{1}{4}$ corner.
- The South side (775') and East side (245') of a private parcel in the Northwest corner of Section 17.
- The West line of Section 16 from the West $\frac{1}{4}$ corner to Southwest section corner.
- The South line of Section 16.
- The East line of Section 16 from Southeast section corner to East $\frac{1}{4}$ corner.
- The East-West $\frac{1}{4}$ line of Section 16 from the Center $\frac{1}{4}$ corner to East $\frac{1}{4}$ corner.
- The North-South $\frac{1}{4}$ line of Section 16 from the Center $\frac{1}{4}$ corner to Center-South $\frac{1}{16}$ corner.
- The South $\frac{1}{16}$ line of Section 16 from the Center-South $\frac{1}{16}$ corner to South $\frac{1}{16}$ corner.

The average precision of these closed traverses after angle adjustment was 1/12624.

Property line was measured around the private parcel (660'x1320') in the Southeast $\frac{1}{4}$ of Section 17. This closed loop traverse was adjusted by Compass Rule. The closing error was 0.33' with a resulting precision of 1/10551.

If needed, adjustments were made to line stakes and corners established along these lines, and the lines between private and federal land were then posted as specified in the contract.

Property line was measured and posted around the private parcel (100'x1325') in the Northwest $\frac{1}{4}$ of Section 16. All corners and line stakes were placed from two inter-visible points. No adjustment performed.

The centerline of County Road 602 was established from monuments as shown on the 1986 Oscoda County Road Plans (Federal Project SR6840 (203), Job No. 25380A). A $\frac{1}{2}$ " rod was found for the road P.I. At station 53+08.40. $\frac{1}{2}$ " rods were found 140 feet left and 70' right of the P.C. at station 66+26.30 as specified on the plans. These monuments were used to determine the centerline of the road for the purpose of monumenting the southerly right of way line where it crosses a posted boundary line in the Northwest $\frac{1}{4}$ of Section 17.

No other road alignment monuments were searched for or found. The remaining centerline is depicted on the control diagram and survey drawings for illustrative purposes only. Measurements were not made to the physical centerline or to monuments controlling the road alignment. Should additional work along the county road be required the monuments controlling the alignment should be recovered at that time.

The results of the field measurements are shown on the enclosed Control Diagram and a list of all project coordinate points is included.

Inspection and encroachment notes:

Boundary lines are well cleared and have been posted according to specifications.

The following encroachments or items were noted along posted boundary lines.

South and East $\frac{1}{16}$ lines of Section 19:

A single wire fence, running from tree to tree, meanders each side of the $\frac{1}{16}$ lines and in places falls 3-10' North or West of line onto federal land.

Two deer blinds were found encroaching West of the East $\frac{1}{16}$ line onto federal land.

North-South $\frac{1}{4}$ line of Section 19:

Two trail roads were noted crossing from private land onto federal land.

Private parcel in Northwest corner of Section 17:

The driveway crosses federal lands before entering County Road 602.

The East boundary line of the private land runs along the edge of the driveway.

The garage in the Southeast corner of the private land is only 2.2' North of line.

West line of Section 16:

Two trail roads were noted crossing from private land onto federal land.

Approximately 250' North of the Southwest corner of Section 16 a lean-to was noted 177.7' West of the boundary line.

South line of Section 16:

Two trail roads were noted crossing from private land onto federal land.

Between the South $\frac{1}{4}$ corner and the East $\frac{1}{16}$ corner a quad trail was found 3-12' South of and approximately parallel with the boundary line.

East line of Section 16:

A trail road was noted crossing from private land to federal land.

East-West $\frac{1}{4}$ line Section 16:

A trail road was noted crossing from private land to federal land.

North-South $\frac{1}{4}$ line Section 16:

A trail road was noted leaving County Road 602, crossing federal land, and then entering private land. The gate for this trail road is on federal land approximately 350' South of the Center $\frac{1}{4}$ corner.

South $\frac{1}{16}$ line Section 16:

A trail road was noted crossing from private land to federal land.

A quad trail was noted crossing the boundary line. A deer blind was found in the same area extending 3.7' North of line

onto federal land.

Private parcel in Southeast $\frac{1}{4}$ of Section 17:

Access to the parcel is over federal land from County Road 602.

The old county road bed crosses the Northeast corner of the parcel.

A quad trail was noted crossing the South boundary line from private to federal land.

Corner Maintenance and Establishment of Section Subdivisional Corners:

Corners F-5, F-7, G-5, G-6 and G-7, T26N, R3E were maintained during this project. In each case the GLO resurvey monuments were recovered. Land Corner Recordation Certificates have been completed and are included as part of this report.

The following seven section subdivisional corners were established by standard methods during this survey.

East $\frac{1}{16}$ corner common to Sections 18 & 19.

Center-East $\frac{1}{16}$ corner Section 18.

South $\frac{1}{16}$ corner common to Sections 16 & 17.

East $\frac{1}{16}$ corner common to Sections 16 & 21.

Center $\frac{1}{4}$ corner Section 16.

Center-South $\frac{1}{16}$ corner Section 16.

Center-West $\frac{1}{16}$ corner Section 16.

Each corner is monumented by a $\frac{1}{2}$ "x18" re-rod with cap # 43046.

Land Corner Recordation Certificates have been completed and are included as part of this report.

Five minor section subdivisional corners were monumented during this survey. Two in Section 16 along the North edge of the 100 foot wide parcel and three in Section 17 around the boundary between private and federal lands in the Northwest quarter. It was anticipated that seven minor section subdivisional corners would be monumented during this project and consequently the submitted invoice is \$253.78 less than the Order for supplies and services.
