

### Active Treatment

#### General Information

Treatment Type	Treatment Method	Treatment Name	Acres	Cover Type	Age
Harvest	Crown Thinning	12016006-Cut	204.9	M	88
BA Range	Site Condition	Proposed Start Date	Fiscal Year	Commercial Harvest	
111-140	None	10/1/2021	2022	<input checked="" type="checkbox"/>	

#### Objectives

- Cover Type Objective
- Northern Hardwood (M)
- Age structure
- Even-Aged
- Acceptable Regeneration

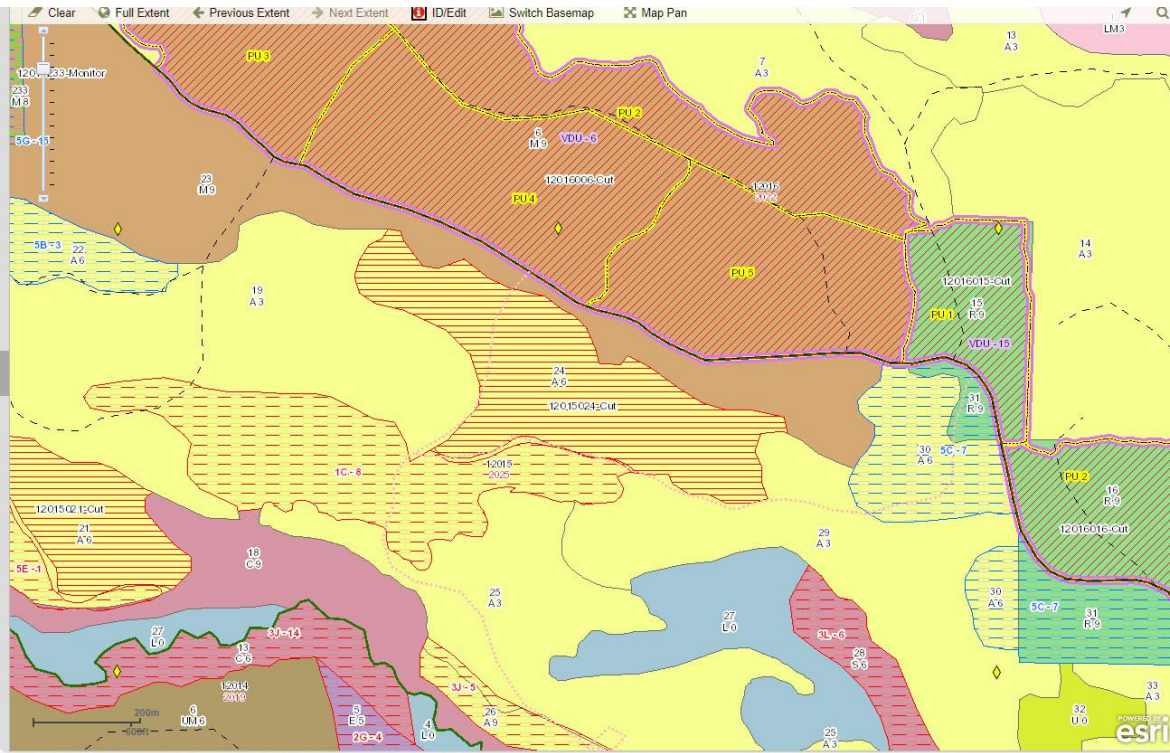

#### Comments

Prescription Specifications

Thin to BA 80 focusing on crop tree release. Do not cut oak or white pine. Open around oaks. Leave representation of all species, particularly ironwood along north edge. Retain some conifer component.

Other Comments

Ironwood is very thick. Much grass also.

Identity

Yes

**Comments**

Lots of rocks. Aspen to north has smaller diameters with heavy hardwood understory. Nice to see some live conifer understory but much mortality as well. More conifer in southwest lobe. Stand looks good and could hold another entry if needed.
