## Sale Specific Conditions & Requirements

Sale Name: Black Backed, Three Toed Moose Sale Number: 12-066-08-01

### 1 - Sale Area

#### 1.2 - Boundaries

##### 1.2.1 - Painted boundaries (6/05)

The sale boundary and Payment Unit boundaries are marked and identified by blue and red paint. Exterior sale boundary lines against private property are marked with blue paint. Exterior sale boundary lines against state are marked with red paint. Do not cut painted boundary line trees unless also marked with orange paint. Unmerchantable trees with vertical orange lines do not have to be cut but can be cut for access purposes, but were NOT counted in the cruise. All log trees have been marked as logs on one side of the tree to avoid confusion on what was called a log.

### 2 - Timber Specifications

#### 2.1 - Included Timber

##### 2.1.1 - Clearcut unit(s) with unmerchantable trees (2/04)

Within Payment Unit(s) 3, cut all trees that are 2 inches or more in diameter measured at a point of four and one-half (4-1/2) feet above ground level regardless of merchantability except spruce and balsam with a stump diameter of 6 " or less measured at 4" above the ground. Also, the purchaser may not cut any cherry, oak, elm, cedar, hemlock and red and white pine if they are present in the sale.

##### 2.1.3 - Cut tree marked unit(s) (8/04)

Within Payment Unit(s) 1 and 2, all trees are designated for cutting when marked with orange paint above and below stump height, regardless of merchantability.

#### 2.2 - Utilization

##### 2.2.4 - Skidding length (2/04)

Skidding of unlimbed tops or lengths over 17 feet is not permissible unless approved by the Unit Manager or their representative.

#### 2.3 - Log Rule

##### 2.3.1 - Log rule (2/04)

All board foot volumes of sawlog size products in this contract have been determined by the International 1/4 Inch Log Rule.

### 3 - Payments

#### 3.4 - Damaged Timber

**3.4.1 - Damaged timber (6/05)**

General Condition and Requirement 3.4 Damaged Timber, defines liquidated damages for undesignated live merchantable trees which are cut or injured. In addition, extreme care should be taken to avoid damage to tree seedlings and saplings. Damage to residual trees (defined as breaking of the cambium layer, broken tops or bending of trees from their natural position) is not acceptable.

No damage is acceptable to merchantable trees. Within the sale area, if more than 10% of trees (> 4.5" DBH) within a specified area of the sale are damaged, liquidated damages will be assessed for all trees damaged. Rates will be in accordance with General Condition and Requirement 3.4 Damaged Timber.

**4 - Transportation**

**4.1 - Construction**

**4.1.6 - Road construction (6/07)**

Construction of new roads or improvements of existing roads shall be done in such a way as to minimize the environmental and visual impacts. Merchantable trees shall be cut and utilized unless otherwise directed. Non-merchantable trees shall be severed and laid flat on the ground. Slash shall be scattered, and not left in windrows and kept a minimum of 10 feet back from the road edge. If Unit 3 (the clearcut) is cut in the winter, a stub road must be built into the sale so the snowmobile trail does not have decking along it. Stumps shall be set upright, not left on edge, and be moved at least 10 feet away from the road edge. Disturbed soil shall be feathered into the woods and not left in berms or windrows.

**4.1.7 - Road closure (4/07)**

All new roads built into the sale must be blocked to vehicle traffic upon completion of the sale. Overgrown roads that are reopened shall be considered new roads. In general, this will require constructing a four (4') foot high berm constructed of stumps and logs covered with earth. Temporary berms may be required if no sale activity occurs for 30 or more consecutive days.

**4.2 - Maintenance**

**4.2.5 - Two wheel drive condition (2/04)**

All existing trail roads on and adjacent to the sale area must be passable by two-wheel drive traffic for the duration of the sale.

**5 - Operations**

**5.1 - Notification**

**5.1.1 - Pre-sale conference (2/08)**

A pre-sale conference on site between the Purchaser and sale administrator is required prior to beginning any operations to determine landing and road locations.

**5.1.4 - Post-sale conference (2/04)**

A post-sale conference on site between the Purchaser and sale administrator is required 5 days prior to the completion of active logging operations to determine clean-up and repair of landings, road edges, and the fulfillment of other contract specifications.

## 5.2 - Conduct of Operations

### 5.2.1 - Slash

#### 5.2.1.7 - Slash must be scattered (2/04)

Unless otherwise directed, slash and logging debris shall be uniformly scattered over the sale area and not left in piles or windrows. Slash shall not be allowed to accumulate at the landings. All slash work shall be done concurrently with harvesting.

### 5.2.2 - Snags

#### 5.2.2.1 - Den trees (2/04)

Obvious hollow and/or den trees shall be protected and left standing unless they are a safety hazard.

### 5.2.3 - Operating Restrictions

#### 5.2.3.1 - Operating restrictions (3/07)

Within Payment Unit(s) 1 and 2, unless changed by written agreement, cutting, skidding, and hauling are not permitted during December 1 to March 31. This restriction is because of the snowmobile trail.

#### 5.2.12 - Bark slippage restriction (3/07)

Within Payment Unit(s) 1 and 2, cutting, skidding, and hauling are not permitted during the period of April 15 to July 15 unless approved by the Area Manager. This restriction is because of bark slippage.

#### 5.2.32 - Decking/landing restoration (2/04)

All decking and landing areas must have the surface area restored to a condition equal to or better than before. This is to insure the proper regeneration of the stand.

#### 5.2.38 - No decking against live trees (2/04)

Cut products may not be decked against unmarked or designated leave trees.

#### 5.2.41 - Snowmobile trail protection (4/07)

Trail 18, Moose County Trail, is a snowmobile trail and is shown on the Timber Sale Map. If the trail is used, it must be maintained throughout the sale and restored to a condition equal to or better than before the sale. Do not cut or damage posts with orange trail markers or traffic control signs. Maintain a 20 foot wide slash, debris, and rut free zone daily using the snowmobile trail as the centerline. If the trail road is to be used for hauling during the snowmobile season, then a snow covered base must be left on the trail. The hardwood portion of the sale cannot be cut during the snowmobile season (December 1st- March 31st) because the snowmobile trail is narrow and dangerous in the section of the road that accesses the sale. The clearcut can be accessed on the road/snowmobile trail because the road is much wider and visuals are better. No decking of forest products will be permitted along the snowmobile trail. All stumps within 20 feet of the snowmobile trail must be cut at ground level.

## 5.4 - Soil Protection

**5.4.1 - Rutting restriction, general (5/08)**

Operations are to cease immediately if equipment and weather conditions result in rutting of roads which is 12 inches or greater in depth and 50 feet in length. In addition, operations are to cease immediately if equipment and weather conditions result in rutting on skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or their representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or their representative's approval, the Purchaser may return to the area when the weather conditions have changed and/or the risk of rutting has decreased.

**5.4.6 - Wet area protection (9/05)**

No harvesting operations, including skidding and felling, are to take place within the vernal pond areas or drainages. There is only one vernal pond in the sale and it will be pointed out at the pre-sale conference. It is near the road in the NE corner of Unit one. Care must be taken by the purchaser to identify and avoid operating in these areas of the timber sale.

**6 - Safety and Fire Prevention**

**6.2 - Signing**

**6.2.2 - Snowmobile trail posting (9/08)**

The Purchaser will be responsible for placing and maintaining warning signs on the snowmobile trail during the snowmobile season (approximately December 1 to March 31). The required location will be approximately 200 feet from the sale boundary and then all along the trail that is being used especially where the hauling begins on the trail and near the sale boundary. The Purchaser will provide these signs for use on State-owned land.

**7 - Other Conditions**

**7.2 - Extensions**

**7.2.1 - One year extension (2/04)**

Given justification, only one, 1 year extension may be granted if the contract has been paid for in full.
