Failure to do so will not relieve the Bidder from responsibility for completing the contract.

The Bidder warrants that this bid is submitted solely on the basis of the Bidder's examination and inspection of the quality and quantity of the timber offered for sale and the Bidder's opinion of the value thereof and the costs of recovery. Roads may require the installation of culverts at cross drainages on wet soils, or across natural drainage-ways. Culverts shall be placed in locations specified by the sale administrator and shall be new, corrugated metal or plastic gauge (see map for possible area where a culvert may be needed). Culverts will be a minimum of 12 inches in diameter and 24 feet long. Culverts shall be installed prior to use of the road. These roads must be rendered impassable to cars and trucks. Contact the sale administrator for specific details.

5 - Operations

5.1 - Notification

5.1.1 - Pre-sale conference (2/08)

A pre-sale conference on site between the Purchaser and sale administrator is required prior to beginning any operations to discuss such issues as decking locations, which roads to use, possible culvert needs, the abandoned campground in the south end of the sale, operating on the low/wet soil types, the barbed-wire fence along the property line, etc.

5.1.4 - Post-sale conference (2/04)

A post-sale conference on site between the Purchaser and sale administrator is required 5 days prior to the completion of active logging operations to determine clean-up and repair of landings, road edges, and the fulfillment of other contract specifications.

5.2.3.1 - Operating restrictions (3/07)

Within Payment Unit(s) 1, unless changed by written agreement, cutting, skidding, and hauling are limited to the period of December 15 to March 1. This restriction is because of the need to cut the sale in winter conditions with sub-freezing temperatures in order to operate in the low/wet soil types. In addition, there is a need to minimize the conflict between the boat launch use that occurs in the summer months. There is also a benefit of a winter time harvest to the deer that use adjacent land as winter deer yards.

5.2.37 - No decking areas (10/04)

No decking is allowed within 50 feet of the DNR Access Road.

5.2.44 - Equipment requirements (2/07)

In order to minimize rutting in the low/wet soil types found throughout the sale area, the use of low ground pressure equipment would be preferred while operating throughout the sale. Chains on tandem axle machines would be recommended.

5.4.1 - Rutting restriction, general (5/08)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads which is 12 inches or greater in depth and 50 feet in length. In addition, operations are to cease immediately if equipment and weather conditions result in rutting on skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or their representative may restrict hauling and/or skidding if ruts exceed the specified depth.
