In addition, extreme care should be taken to avoid damage to tree seedlings and saplings. Damage to residual trees (defined as breaking of the cambium layer, broken tops or bending of trees from their natural position) is not acceptable.

No damage is acceptable to merchantable trees. Slash shall be scattered, and not left in windrows and kept a minimum of 10 feet back from the road edge. Stumps shall be set upright, not left on edge, and be moved at least 10 feet away from the road edge. Disturbed soil shall be feathered into the woods and not left in berms or windrows.

4.1.7 - Road closure (4/07)

In general, this will require stumps, tops, and slash to be placed along the entire length of new road. These roads must be rendered impassable to cars, trucks, and ORV's. If the old haul road is to be used to access Unit 3 the road must be blocked with stumps, tops, and slash the first 200 yards off of the Second Lake Road. Also, the purchaser must use an old trail (as identified on the timber sale map) to access Unit 1 of the timber sale. This will minimize damage to a hardwood stand East of Unit 1. Contact the sale administrator for specific details of design and placement.

4.1.8 - Road work (1) (8/07)

Road work must be completed to Units 1 & 5 prior to beginning of harvest operations. 5.2.4 - Dead and Down Creation

5.2.4.3 - Dead and down creation, dead trees (6/07)

Except as provided for in General Condition and Requirement 5.2.2, no dead trees, standing or down, are to be cut, skidded, or processed.

Maintain a 20 foot wide slash, debris, and rut free zone daily using the ORV trail as the centerline. Equipment is allowed to run down the ORV trail on the West side of Unit 4 to access the timber. No decking is allowed along the ORV trail. If the trail is used to access Unit 4 a small spur is required to allow decking off of the ORV trail. Upon completion of Unit 4 stumps, slash, and tops must be placed from Second Lake Road to where the ORV trail begins to prohibit vehicular movement. Warning signs must be placed on both ends of the trail before harvest operations begin.

5.2.41 - Snowmobile trail protection (8/09)

A snowmobile trail is shown on the Timber Sale Map. Do not cut or damage posts with orange trail markers or traffic control signs. If the trail is used, it must be maintained and restored to a condition equal to or better than before the sale. If the trail road is to be used for hauling during the snowmobile season, then a snow covered base must be left on the trail. Maintain a 20 foot wide slash, debris, and rut free zone daily using the snowmobile trail as the centerline. Warning signs must be placed on both ends of the trail before harvest operations begin.

5.4 - Soil Protection

5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads which is 12 inches or greater in depth and 50 feet in length. In addition, operations are to cease immediately if equipment and weather conditions result in rutting on skid trails which is 6 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

5.8 - Protection of Endangered Species

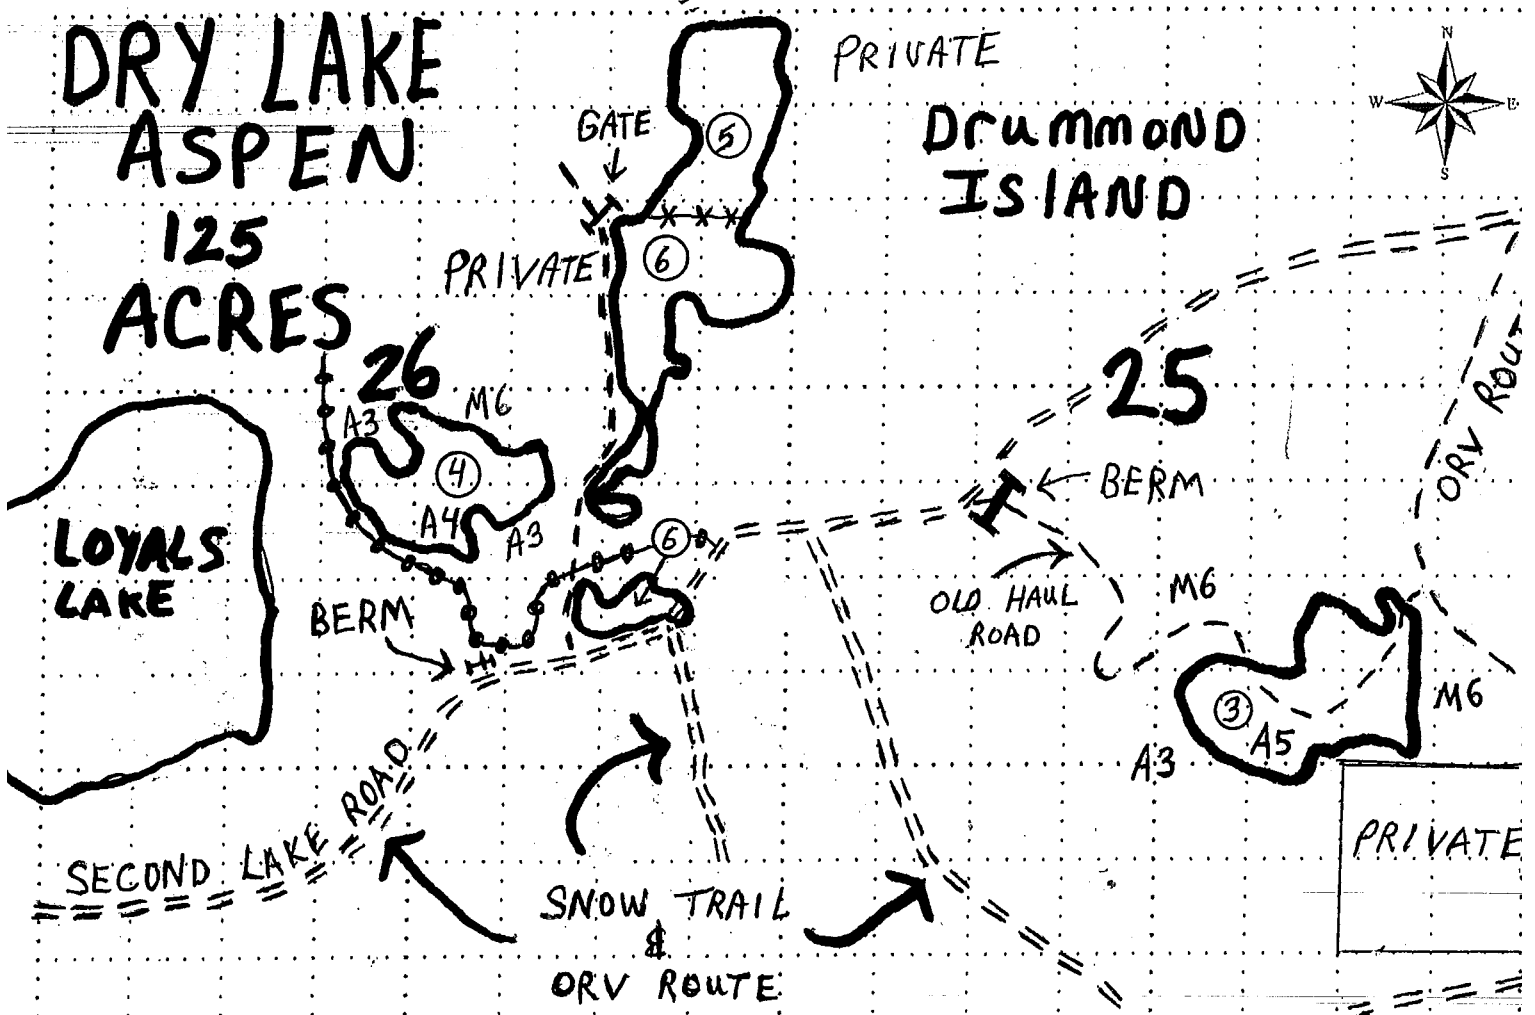

5.8.5 - Protection of raptor nests (4/09)

All trees with raptor nests will be protected if found during harvesting operations. Notification will be made to the Unit Manager or his/her representative who will notify the Wildlife Biologist so an on-site evaluation and recommendation can be made, if necessary.
