2 - Timber Specifications

2.1 - Included Timber

2.1.1 - Clearcut unit(s) with unmerchantable trees (8/11)

Within Payment Unit(s) 1, 2, 3, 5, 6, 7, 8, 9, and 10, cut all aspen and balsam trees that are three (3) inches or more in diameter measured at a point four and one-half (4-1/2) feet above ground level regardless of merchantability and also cut all hardwood and softwood species that are four (4) inches or more in diameter; except do not cut white pine, beech or elm. In addition do not cut the white spruce in units 2 and 3 or trees marked with a red "X" in units 2, 7 and 10. There are retention areas within units 2, 6, 7, 8 and 9. These areas are designated with a red paint line around them. No mechanical operations are to occur within these areas.

2.1.3 - Cut tree marked unit(s) (12/08)

Within Payment Unit(s) 4 and 11, all trees are designated for cutting when marked with orange paint above and below stump height, regardless of merchantability. The red pine is marked to harvest every third row, but in some of the designated rows we have left some trees un-marked. There are voids in some of the adjacent rows that the contractor will have to operate in to harvest the designated trees. There are about 20 charred trees in the southern portion of unit 11. The char is only up about 4 feet on the stem.

2.1.15 - Hazard trees near roads (9/11)

Cut and remove all standing dead trees within 100 feet of the cleared portion of the Westman Dam Road. These cut snags may be utilized or must be scattered back into the sale area.

3 - Payments

3.3 - Pre-measured Sales

3.3.4 - Dividing payment units (12/08)

Payment unit(s) with a value greater than \$18,000 may be divided at the request of the purchaser and upon approval of the Unit Manager. Dividing payment units is a contract modification which requires a Timber Sale Contract Supplement.

4 - Transportation

4.1 - Construction

4.1.8 - Road work (1) (8/07)

The following road work is required: the contractor must purchase and install two new 12" inch by 24' foot in length corrugated steel culverts on the access road from unit 4 back into unit 9. The contractor must haul and spread 120 yards of gravel over the culverts and in some washed out areas along the same portion of the access road. There must be a minimum of 12 inches of gravel over each culvert. The gravel is available from a state pit on the north end of the Westman road, which is just over 5 miles away. The culvert locations are shown on the timber sale map. All road work must be completed prior to any harvesting operations beginning. No DEQ permits are necessary for the installation of the culverts.

4.2 - Maintenance

4.2.1 - Hauling restriction (12/08)

Hauling may be restricted on forest roads by the Unit Manager or his/her representative. The restriction may occur during spring breakup or during other wet weather conditions.

4.2.4 - Grading (12/08)

Roads must be graded after the sale is completed. In general, this will require a road grader or bull dozer to shape up the roads after forest products have been hauled off site. The grading equipment to be used must be approved by the Unit Manager or his/her representative.

5 - Operations

5.2 - Conduct of Operations

5.2.1 - Slash

5.2.1.1 - Slash within sale area (2/04)

No trees are to be felled outside the sale area and all slash is to be kept at least 10 feet back from the blue paint line.

5.2.1.2 - Slash Removal

5.2.1.2.1 - Slash removal, right-of-way (12/04)

All slash must be removed at least 50 feet from the cleared right-of-way of the Westman Dam Road.

5.2.3 - Operating Restrictions

5.2.3.1 - Operating restrictions (9/11)

Within Payment Unit(s) 1, unless changed by written agreement, cutting and skidding are limited to the period of December 1st to March 31st. This restriction is because of the wet lowland area between units 1 and 2.

5.2.3.3 - Bark slippage restriction (3/09)

Within Payment Unit(s) 4 and 11, unless changed by written agreement, cutting and skidding are not permitted during the period of April 15 to July 15. This restriction is because of bark slippage.

5.2.22 - Operating Caution

5.2.22.1 - Operating caution (6/11)

It is recommended, but not required, that within Payment Unit(s) 2, 3, 6, 7 and 9, cutting and skidding occur during dry summer or frozen winter conditions. The reason for the recommendation is because all of these units have some low wet areas within them. All of these units tend to dry up in the summer and with the proper machinery they should be operable during most summers.

If rutting becomes a problem within any one of the units listed above, all of the remaining units listed will have to be harvested between December 1st and March 31st when the ground is frozen.

5.2.37 - No decking areas (12/08)

No decking is allowed within 50 feet of the Westman Dam Road without permission of the Menominee Road Commission.

5.4 - Soil Protection

5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

6 - Safety and Fire Prevention

6.2 - Signing

6.2.1 - Road posting (9/09)

The purchaser is responsible for posting and maintaining caution signs on Westman Dam Road prior to beginning operations. The road must be posted at appropriate distances from the sale area to warn of logging activity and truck traffic. Signs must be removed when harvest operations are suspended or completed. The Purchaser will provide these signs.
