The following road maintenance is required: Within 60 days of completion of hauling, or if no hauling occurs for 60 days, the road must be maintained and graded. 2.2 - Utilization

2.2.3 - Stump heights (4/07)

Stump heights within the Sale Area shall not exceed 6 inches for trees greater than 10 inches DBH and 4 inches for trees smaller than 10 inches DBH.

2.2.5 - Limbed tree skidding (1/09)

The skidding of whole trees or tree segments with limbs attached is prohibited unless approved by the Unit Manager or his/her representative. This applies to all Payment Units except 1 and 3.

3 - Payments

3.4 - Damaged Timber

3.4.1 - Damaged timber (6/05)

General Condition and Requirement 3.4 Damaged Timber, defines liquidated damages for undesignated live merchantable trees which are cut or injured. In addition, extreme care should be taken to avoid damage to tree seedlings and saplings. Damage to residual trees (defined as breaking of the cambium layer, broken tops or bending of trees from their natural position) is not acceptable.

Within the sale area, if more than 33% of the tree seedlings or saplings (1/4" to 4.5" DBH) within a specified portion of the sale area are damaged, liquidated damages will be assessed at \$300 per acre for all acreage within that specified portion of the sale area that was damaged.

No damage is acceptable to merchantable trees. Within the sale area, if more than 5% of trees (> 4.5" DBH) within a specified area of the sale are damaged, liquidated damages will be assessed for all trees damaged. Rates will be in accordance with General Condition and Requirement 3.4 Damaged Timber.

4 - Transportation

4.1 - Construction

4.1.3 - Slash and earthen piles (8/04)

Piles or windrows of earth along roads and landings that have been widened or constructed shall be leveled. Slash from road maintenance or construction, including stumps, shall be reserved for road closure, chipped, or dispersed throughout the cutting

units. Unmerchantable trees shall be cut, not pushed over.

4.1.7 - Road closure (10/11)

Some existing roads may also need to be closed. See the Timber Sale Map for locations. Stumps from road construction must be placed along the length of the trail. These roads must be rendered impassable to cars and trucks. Contact the sale administrator for specific details of design and placement.

4.1.8 - Road work (1) (8/07)

The following road work is required:

NOTE: All timber from road clearing is included in this contract.

NOTE: The DNR shall provide all culverts required below.

1) On the state forest road just East of the intersection of Geneva and Olson Roads: Installation of two (2) equalization culverts. Cut all timber to 33 feet North of center line of same road.

2) Installation of culvert on McGrudder Rd. just south of Payment Units 5 and 6.

3) Clearing timber to 33 ft. from the centerline on both sides of McGrudder Rd. between Payment Units 6 & 7.

4) Building a twenty foot (20') wide road between the landings for Payment Units 3 and 5, including installation of one (1) culvert.

Within 60 days of completion of hauling, or if no hauling occurs for 60 days, the roads must be maintained and graded. This includes cleaning of drainage areas, grading, crowning and filling with gravel, if necessary. Damages will be assessed if grading/repair does not occur.

5 - Operations

5.1 - Notification

5.1.1 - Pre-sale conference (10/11)

A pre-sale conference on site, to determine landing and road locations, between the Purchaser and sale administrator is required prior to beginning any operations in each Payment Unit. The Unit Manager or his/her representative must be contacted at least 2 days in advance to schedule the conference. At the Sale Administrator's discretion, all Payment Units may be addressed in one or multiple pre-sale conferences. At the Sale Administrator's discretion, pre-sale conference(s) may occur over the telephone. The Sale Administrator shall be contacted each time operations cease temporarily and/or resume in each Payment Unit.

5.1.4 - Post-sale conference (6/11)

A post-sale conference on site between the Purchaser and sale administrator is required 2 days prior to the completion of active logging operations to determine clean-up and repair of landings, road edges, and the fulfillment of other contract specifications. The purchaser is responsible for contacting the Sale Administrator to arrange this conference.

5.2 - Conduct of Operations

5.2.1 - Slash

5.2.1.8 - Slash height (12/08)

No slash may exceed 24 inches in height. Slash must be kept ten (10) feet back from blue paint lines.

5.2.2 - Hazard Trees/Snags

5.2.2.1 - Den trees (2/04)

Obvious hollow and/or den trees shall be protected and left standing unless they are a safety hazard.

5.2.3 - Operating Restrictions

5.2.3.2 - Operating restrictions (9/11)

Within Payment Unit(s) 3, 5, 6, and 7, unless changed by written agreement, cutting, skidding, and hauling are limited to the periods of 7-15 to 9-30 and 1-1 to 3-15.

Within Payment Units 1, 2 and 4, unless changed by written agreement, cutting, skidding, and hauling are limited to the periods of 1-1 to 3-15.

This restriction is because of seasonally flooded areas, wet soils and old aspen. Conditions permitting, this period may be extended with written permission from the Unit Manager or His/Her representative.

5.2.3.11 - Coppice regeneration protection (4/10)

Any timber harvesting or post harvest operations, such as felling, skidding, or chipping, in any Payment Unit, must be completed before sprouting of regeneration occurs in that Payment Unit, so as to avoid damage to the new regeneration. If it is anticipated that chipping will be delayed, then tops shall be carried to one central location or left unchipped. The Unit Manager or his/her representative may cease operations if sprouting occurs before the operation is complete.

5.2.4 - Dead and Down Creation

5.2.4.3 - Dead and down creation, dead trees (6/07)

Except as provided for in General Condition and Requirement 5.2.2, no dead trees, standing or down, are to be cut, skidded, or processed. Exception: All dead trees within 50' of private property line will be cut and left on the ground.

5.4 - Soil Protection

5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

7 - Other Conditions

7.5 - Loss

7.5.1 - Deteriorating timber (7/09)

The sale area has received damage from Emerald Ash Borer. Only live ash trees were cruised. In addition, the aspen in the sale is old and dying. The Purchaser should harvest the wood as soon as possible. The Department of Natural Resources is held free of responsibility of any further damage or deterioration due to delay in harvesting.
