Sale Specific Conditions & Requirements

Sale Name: Deer Creek Sale Number: 33-033-15-01

1 - Sale Area

1.2 - Boundaries

1.2.1 - Painted boundaries (1/14)

The sale boundary and Payment Unit boundaries are marked and identified by blue, red and/or yellow paint. Exterior sale boundary lines against private property are marked with blue paint. Exterior sale boundary lines against state are marked with red paint. Interior Payment Unit boundaries are marked with yellow paint. The painted boundary line trees are not Included Timber and are to be protected. Yellow painted trees designating an interior Payment Unit boundary are only to be cut when all surrounding Payment Units have been paid for.

2 - Timber Specifications

2.1 - Included Timber

2.1.1 - Clearcut unit(s) with unmerchantable trees (6/14)

Within Payment Unit(s) 5, 6, 7, 8, 9, and 11, cut all trees that are three (3) inches or more at DBH; except hemlock and pine.

In addition:

Within units 5, 7, 8, and 9 do not cut yellow birch, white spruce, and sub-merchantable black ash.

Within units 6 and 11 do not cut cedar and trees marked with green paint.

Within units 5 and 7, there are two retention patches in unit 5 and one retention patch in unit 7. These patches are bounded with red paint and need to be protected. No harvesting activities may occur within these areas.

2.1.3 - Cut tree marked unit(s) (12/08)

Within Payment Unit(s) 4B, all trees are designated for cutting when marked with orange paint above and below stump height, regardless of merchantability. Units 4A and 4B are part of the same payment unit, but have different cutting specifications.

2.1.4 - Species designation unit(s) (12/08)

Within Payment Unit(s) 10, all trees greater than three (3) inches at DBH are designated for cutting; except hemlock, cedar, spruce, and sub-merchantable black ash.

There is a portion of this stand that was under water at the time of sale prep, due to beaver activity. If the water in this area recedes during the life of the contract, another 8 to 10 acres can be added to the contract. This will be additional wood and it would have to be paid for at the contract rates and documented on a contract supplement.

2.1.7 - Leave tree marked unit(s) (6/14)

Within Payment Unit(s) 1, 2, 3, and 4A, cut all trees that are three (3) inches or more at DBH; except hemlock, sub-merchantable black ash, and trees marked with green paint above and below stump height.

In addition:

Within unit 1 do not cut yellow birch.

Within units 3 and 4A do not cut pine and yellow birch. Within these units there are no trees marked with green paint.

Within units 1 and 4A, there is a retention patch. These patches are bounded by red paint and need to be protected. No harvesting activities may occur within these areas.

2.1.11 - Description of timber note (2/04)

Note that the mixed hardwood sawlog and pulpwood volumes are primarily a mix of red maple and ash. Spruce and balsam fir are the primary species that make up the softwood pulpwood volume.

3 - Payments

3.3 - Pre-measured Sales

3.3.4 - Dividing payment units (7/14)

Payment Unit(s) \$18,000 in value or greater may be divided at the request of the Purchaser and upon approval of the Unit Manager. Dividing Payment Units is a contract modification which requires a Timber Sale Contract Supplement. There will be only one division per Payment Unit.

4 - Transportation

4.2 - Maintenance

4.2.1 - Hauling restriction (12/08)

Hauling may be restricted on forest roads by the Unit Manager or his/her representative. The restriction may occur during spring breakup or during other wet weather conditions.

4.2.4 - Grading (12/14)

For completion of the sale, state forest roads must be graded. In general, this will require a road grader or bull dozer to shape up the roads after forest products have been hauled off site. This includes cleaning of drainage areas, grading, crowning and filling with gravel, if necessary. The grading equipment to be used must be approved by the Unit Manager or his/her representative.

5 - Operations

5.2 - Conduct of Operations

5.2.3 - Operating Restrictions

5.2.3.1 - Operating restrictions (9/11)

Within Payment Unit(s) 1, 9, 10, and 11, cutting and skidding are limited to the period of December 1st to March 31st, unless there is an extended dry or frozen period and the sale administrator approves harvesting during that time period. This restriction is because of low wet ground throughout the units and access into unit 9 will be through low ground.

5.2.22 - Operating Caution

5.2.22.1 - Operating caution (6/11)

It is recommended, but not required, that within Payment Unit(s) 2, 3, 4A, 4B, 5, 6, 7, and 8, cutting and skidding occur during dry summer or frozen winter conditions. The reason for the recommendation is because some of the access trails/roads will be through low ground and there are some ash drainages within the units.

5.2.39 - ORV trail/route protection (12/12)

The Forest Island Trail is an ORV trail or route and is shown on the Timber Sale Map. Do not cut trees or damage posts with orange ORV markers. Maintain a 20 foot wide slash, debris, and rut free zone daily using the ORV trail or route as the centerline.

6 - Safety and Fire Prevention

6.2 - Signing

6.2.1 - Road posting (9/09)

The Purchaser is responsible for posting and maintaining caution signs on the Forest Island Trail/road prior to beginning operations. The road must be posted at appropriate distances from the sale area to warn of logging activity and truck traffic. Signs must be removed when harvest operations are suspended or completed. The Purchaser will provide these signs. The ORV trail is also a poor dirt road, which will provide access into a large portion of the sale.
