1.2.1 - Painted boundaries (1/14)

The sale boundary is marked and identified by red paint and permanent features such as roads, fences, and cover type changes, as shown on the timber sale map. The painted boundary line trees ARE Included Timber and may be cut as long as the stump mark remains visible.

2 - Timber Specifications

2.1 - Included Timber

2.1.1 - Clearcut unit(s) with unmerchantable trees (6/14)

Within Payment Unit(s) 1, 2, and 3, cut all trees that are one (1) inches or more at DBH.

Within Payment Unit 4 (burned timber), the producer shall cut and utilize as much of the timber as possible. If the deteriorated timber is not merchantable, the producer shall knock down, run over and break up the wood. This is to speed up the rotting process and facilitate fire control.

2.1.11 - Description of timber note (2/04)

Note that Jack Pine Pulpwood includes approximately 16.6 mbf sawlogs (mostly in Unit 3), Mixed Oak Pulpwood includes approximately 1 mbf oak sawlogs and 4 cords black cherry pulpwood, and Mixed Softwood Pulpwood includes approximately 1 mbf black spruce sawlogs.

Also, note that Unit 4 is mostly burned over jack pine with scattered living trees. This material is being sold on a per acre basis as chipped pulpwood, in the hopes that it can be chipped and utilized. If not, it must be dealt with per Specification 2.1.1 before either Unit 2 or Unit 3 can be cut.

2.2 - Utilization

2.2.2 - Chipping required (5/14)

This area must be chip harvested to meet National Guard requirements. Products may be produced as roundwood and forwarded to decking areas in final product length, but the tops must be left intact and skidded to the landing for chipping in order to minimize the amount of residual slash left in Military training areas. The requirement to retain approximately 1/6 to 1/3 of tree tops and limbs less than four inches in diameter does NOT apply (G. C. & R. 2.2) because this is non-certified timber on Military Board Land.

2.2.3 - Stump heights (4/07)

Stump heights within the Sale Area shall not exceed 6 inches for all trees. This is in order to meet military requirements.

3 - Payments

3.6 - Payment Unit Cutting Schedule

3.6.1 - Order of cutting (1/09)

Payment Units shall be cut in an order that ensures Unit 4 (burned timber) is completed before either Unit 2 or Unit 3 is opened.

4 - Transportation

4.1 - Construction

4.1.3 - Slash and earthen piles (8/04)

Piles or windrows of earth along roads and landings that have been widened or constructed shall be leveled. Slash from road maintenance or construction, including stumps, shall be chipped, utilized or otherwise removed from the sale.

4.1.6 - Road construction (1/09)

Improvements of existing roads shall be done in such a way as to minimize the environmental and visual impacts. Merchantable trees shall be cut and utilized unless otherwise directed. Non-merchantable trees shall be severed and laid flat on the ground. Slash shall be chipped, utilized or otherwise removed from the sale. Stumps shall be set upright, not left on edge, and be moved at least 10 feet away from the road edge. Disturbed soil shall be feathered into the woods and not left in berms or windrows.

4.1.12 - No new roads (1/12)

No new roads will be permitted. Skid trails only will be allowed.

4.4 - Access

4.4.3 - Access gate (12/08)

Gates must be locked at all times. This is to prevent someone other than the Purchaser from going through the gate and being locked in.

5 - Operations

5.1 - Notification

5.1.1 - Pre-sale conference (10/11)

A pre-sale conference on site between the Purchaser and sale administrator is required prior to beginning any operations to determine landing locations and coordinate access with Camp Grayling Range Control. The Unit Manager or his representative must be contacted at least 5 days in advance to schedule the conference.

5.1.4 - Post-sale conference (6/11)

A post-sale conference on site between the Purchaser and sale administrator is required 3 days prior to the completion of active logging operations to determine clean-up and repair of landings, road edges, and the fulfillment of other contract specifications.

5.1.5 - National Guard notification (2/15)

This sale is upon lands utilized for training by the Michigan National Guard - Camp Grayling. A minimum of five (5) business days prior to opening this sale, the producer must request that the sale administrator contact the military for information regarding training plans that may impact sale operations.

5.2 - Conduct of Operations

5.2.3 - Operating Restrictions

5.2.3.7 - National Guard training restriction (1/09)

The Small Arms Ranges are year-round training facilities, but their peak activity is between May 1 and October 31. The contractor must check with the Sale Administrator who will coordinate the cutting schedule with Camp Grayling Range Control. All harvest equipment and timber products must be removed from the sale area during the restricted period.

5.2.22 - Operating Caution

5.2.22.1 - Operating caution (6/11)

It is recommended, but not required, that within Payment Unit(s) 1, 2, 3, and 4, cutting, skidding, and hauling occur during dry summer or frozen winter conditions. The reason for the recommendation is because of wet ground along the northern edge of the sale.

5.2.32 - Decking/landing restoration (9/13)

All decking and landing areas must have the surface area restored to a condition equal to or better than before. This is to ensure the proper regeneration of the stand. Wood debris, chips and "cookies" from trimmings must be removed or scattered away from landing and loading areas and may not be windrowed on the edge.

5.4 - Soil Protection

5.4.1 - Rutting restriction, general (1/09)

Operations are to cease immediately if equipment and weather conditions result in rutting of roads and skid trails which is 12 inches or greater in depth and 50 feet in length. The Unit Manager or his/her representative may restrict hauling and/or

skidding if ruts exceed the specified depth. With the Unit Manager or his/her representative's approval, the Purchaser may return to the area when the risk of rutting has decreased.

5.5 - Protection of Improvements

5.5.3 - Protection of improvements detail (10/13)

Special care should be taken to avoid damaging range fences and installations and the pair of monitoring wells in Unit 3, as shown on the timber sale map.

6 - Safety and Fire Prevention

SKIP

6.4 - Unexploded ordinance (7/15)

Be aware that the sale area could contain UXO (unexploded ordinances). Do not touch, or drive over any metal objects. If any objects are found, please flag the area and notify the Unit Manager or his/her representative, so that they can make arrangements with the Military.

7 - Other Conditions

7.2 - Extensions

7.2.3 - Salvage extension (6/13)

This is a salvage sale with a short contract length. The sale must be harvested promptly. One (1), twelve (12) month extension can be applied to one (1) other State Forest Timber Sale Contract owned by the purchaser or owned by one (1) designated sub-contractor of the Purchaser that works this contract. To qualify, the contract expiration date of the contract to be extended must be within twelve (12) months from the issue date of this contract. If this is the first extension on the other State Forest Timber Sale Contract, then the 5% extension fee will be waived. If this is an additional extension, the 10% fee will be reduced to 5%. The salvage extension must be used before this contract is closed-out. This specification does not alleviate the purchaser from any contractual obligations of the extended State Forest Timber Sale Contract. Per General Condition & Requirement 7.2, extensions are at the sole discretion of the DNR.

The value of the extension is limited to \$2,000. This extension can be used on one sale with a fee that is equal to or less than \$2,000, or used as a \$2,000 credit on one sale with a fee greater than \$2,000.

7.5 - Loss

7.5.1 - Deteriorating timber (7/09)

The sale area has received damage from wildfires. Within Unit 4, about 190 acres of jack pine were burned over in 2010 and about 20 acres were burned over in 2012. The Purchaser should harvest the wood as soon as possible. The Department of Natural Resources is held free of responsibility of any further damage or deterioration due to delay in harvesting.

7.10 - Certified Timber

7.10.1 - Non-certified timber (12/05)

The area encompassed by this timber sale is not certified to the standards of the Forest Stewardship Council (FSC) or the Sustainable Forestry Initiative (SFI).
