

Portage Creek Celery Flats

Fish Species

Brown Trout

Species Description

Brown trout are stocked in Portage Creek. Anglers can expect to catch brown trout between 8 and 15 inches.

Geographic Coordinates

Lat:42.210109 / Long:-85.584011

Noteworthy

Owned by the City of Portage, Celery Flats is really a park within a park. A key element of the Portage Creek Bicentennial Park, Celery Flats has two distinct settings. On the north side of Garden Lane, the Celery Flats Interpretive Center highlights the importance of the celery industry to Kalamazoo County. The Celery Flats Historical Area, with several relocated and restored buildings, is located south of Garden Lane. The Historical Area is the site of many community events and several of the buildings can be reserved for private group use. A visit to the Celery Flats offers activities for everyone. The area is equipped with playground facilities, a picnic area and walking trails in every direction.

Fishing Regulations

Portage Creek is a designated Type 4 trout stream to the downstream boundary of Kilgore Rd. (T3S, R11W, S3). Please refer to the Inland Trout and Salmon Stream Regulations in the current Michigan Fishing Guide.

Directions to Site

Access points are along the Portage Creek Bicentennial Park (Celery Flats) between Kilgore and Garden Lane. Parking is available at the Lover's Lane Trailhead, just south of Kilgore Road, at the main entrance on Milham Avenue just west of Lover's Lane, and at the Celery Flats Historical Area at Garden Lane.
