

Compartment Review Presentation

Gaylord Forest Management Unit

Compartment 52041

Entry Year 2017

Acreage: 1,726

County Charlevoix

Management Area: Chandler Hills

Revision Date: 2015-05-11

Stand Examiner: Zach Crew

Legal Description:

T33N R04W Sections: 31, 32, and 33

Identified Planning Goals:

To provide for the protection, integrated management and responsible use of a healthy, productive and undiminished forest resource base for the social, recreational, environmental and economic benefit of the State of Michigan.

Soil and topography:

Kalkaska and Leelanau Sands. Chandler Hills are a very steep glacial feature with hills up to 70% slope and elevation changes of 300+ feet. Level terrain associated with Springbrook Swamp.

Ownership Patterns, Development, and Land Use in and Around the Compartment:

Area is frequently subjected to dispersed camping and associated resource damage concerns. Dispersed recreation is evident throughout the compartment.

Unique Natural Features:

Potential for red-shouldered hawk and goshawk. Potential for massasauga, Blanding's turtle and wood turtle along Springbrook Creek. Potential for great blue heron rookery, eagle, and osprey. Potential for calypso orchid, ram's head orchid, and limestone oak fern in conifer swamp. Central portion of the compartment contains Chandler Hills Lower Bear River PLU.

Archeological, Historical, and Cultural Features:

There are HAL concerns in section 33.

Special Management Designations or Considerations:

Purchased by State Game Fund prior to Act 325.

Watershed and Fisheries Considerations:

This compartment is in the Spring Brook watershed. Spring Brook is a high quality, naturally reproducing brook trout stream, arguable one of the best brook trout streams in the Lower Peninsula. Many small intermittent streams that connect to the North Branch of Spring Brook are located in near treatment areas. Though none of the treatments proposed appear as though they will have direct impacts, the small tributaries found within the swampy lowland areas should be protected with the appropriate BMP's.

Wildlife Habitat Considerations:

Treatments in this compartment will maintain age class diversity in aspen and oak while creating early successional habitat benefiting deer, grouse, wild turkey and woodcock. Oak clumps and/or large crowned oak will be left where appropriate for hard mast. Openings are prescribed to be maintained and supplemented with hard and soft mast plantings benefiting deer, grouse, wild turkey, and woodcock.

Mineral Resource and Development Concerns and/or Restrictions

Surface sediments consist of an end moraine of coarse-textured till and glacial outwash sand and gravel and postglacial alluvium. The glacial drift thickness varies between 200 and 400 feet. Beneath the glacial drift is the Antrim Shale. The Antrim is quarried for cement products elsewhere in the state. A gravel pit is located in Section 33 (Chandler Hill Rd Pit) and potential is good. This area may be too far north for development of the Antrim Shale, as the Antrim Shale is nearing its subcrop limit. There is Antrim production in Section 34. Much of State minerals in the compartment are currently under lease.

Vehicle Access:

LAND USE ORDERS OF THE DIRECTOR 4.12 Certain state-owned lands, Charlevoix county, wheeled motorized vehicles, camping, prohibited conduct. A person shall not operate a motorized vehicle upon the E½ of the E¼ of section 16, any part of section 21, the N½ of section 28, and the NW¼ of section 33, T33N R4W.

Parcels east of the power line have excellent access in areas of up land. Slashing and Chandler Hill Roads have recently been resurfaced. Forest roads provide adequate but hilly access. Erosion concerns on forest roads are valid. Western portions of the compartment are accessed by a seasonal county road and forest roads. Vehicles are not capable of using the power line to cross the compartment.

Survey Needs:

None at this time.

Recreational Facilities and Opportunities:

The Springbrook walking trail and The North Country Trail are found in this compartment. A MCCCT trail and snowmobile trail #76 are also present. This area is heavily used by dispersed campers spring through fall. Many forms of outdoor recreation evident throughout.

Fire Protection:

Cover types are not prone to large fire events. Topography will be equipment limiting. If a fire does occur potential for large project fire exists due to access limitations.

Additional Compartment Information:

The following reports from the Inventory are attached:

- Total Acres by Cover Type and Age Class**
- Cover Type by Harvest Method**
- Proposed Treatments – No Limiting Factors**
- Proposed Treatments – With Limiting Factors**
- Stand Details (Forested and Nonforested)**
- Dedicated and Proposed Special Conservation Areas**
- Site Condition Details**

The following information is displayed, where pertinent, on the attached compartment maps:

- Base feature information, stand boundaries, cover types, and numbers**
- Proposed treatments**
- Site condition boundaries**
- Details on the road access system**

Habitat Cut: No**Site Condition:**

Prescription Final harvest all trees 2" and up. Buffer creeks by 75'. West portion will most likely be impacted.

Specs:

Next Step

Treatments:

Acceptable Fir, cedar, black spruce, hemlock red maple, birch, and aspen at minimum stocking is acceptable

Regen:

Other It is wet in pockets. There is more water in western portions. Use retention to protect areas too wet to harvest. These trees will also provide an excellent seed source for the stand. NE if fairly operable year round but operations will be difficult in western portions without a good winter. River is along western boundary. Use adequate buffer. Old next step comments:

Report 6 – PROPOSED SPECIAL CONSERVATION AREA* (SCA) DETAILS

* This is a partial list of SCAs for this compartment. Not included are those areas identified under other Department initiatives (Natural Rivers, Deer Wintering Areas, etc.). Those will be identified in separate, future map and report products.

| SCA Name | SCA Category | Detail Type | Recommendation | Acres |
|----------|--------------|-------------|----------------|-------|
|----------|--------------|-------------|----------------|-------|

Comments

Report 7 – EXISTING SPECIAL CONSERVATION AREA DETAILS

* This is a list of SCA's for this compartment along with a 1/4 mile buffer surrounding the compartment. Refer to the Special Conservation Area Map for locations of the below listed Conservation Areas.

ERA = Ecological Reference Area
 HCVA = High Conservation Value Area
 SCA = Special Conservation Area

| Conservation Area | Type | Description |
|-------------------|-------------------|--|
| SCA | Cold Water Stream | A coldwater stream has temperature and dissolved oxygen conditions that allow naturally-reproduced or stocked trout populations and those of other coldwater fish species (e.g., slimy sculpin) to persist from year to year. Coldwater streams in Michigan typically provide these conditions due to substantial contributions of groundwater to their stream flows. Such streams are established by Director's action and designated as trout resources by Fisheries Order 210. |
| SCA | Riparian Area | A transitional area between aquatic and terrestrial ecosystems in which the terrestrial ecosystem influences the aquatic ecosystem and vice-versa. Because of the unique conditions adjacent to lakes, streams and open water wetlands, riparian areas harbor a high diversity of plants and wildlife. Riparian communities are ecologically and socially significant in their effects on water quality and quantity, as well as aesthetics, habitat, bank stability, timber production, and their contribution to overall biodiversity. |

| Stand | Level 4 Cover Type | Size Density | Acres | Stand Age | BA Range | General Comments: |
|-------|--|-------------------|-------|-----------|----------|--|
| 1 | 4110 - Sugar Maple Association | Sawtimber Well | 273.6 | 93 | 111-140 | Appears to have been previously thinned |
| 2 | 4138 - Aspen (OI) | Sapling Well | 8.5 | 17 | Immature | |
| 4 | 4130 - Aspen | Poletimber Well | 4.5 | 33 | 51-80 | |
| 5 | 4130 - Aspen | Poletimber Well | 42.7 | 27 | 1-50 | Transitioning from A3 to A6. |
| 7 | 4119 - Mixed Northern Hardwoods | Sawtimber Well | 149.4 | 85 | 81-110 | |
| 9 | 4130 - Aspen | Poletimber Medium | 37.3 | 43 | 51-80 | Nice looking A6 stand |
| 10 | 4319 - Mixed Upland Forest | Sawtimber Medium | 15.0 | 104 | 51-80 | Lowland pockets with cat tails, lots of deer browse. |
| 12 | 4199 - Other Mixed Upland Deciduous | Sawtimber Well | 7.5 | 95 | 81-110 | Stand was grazed in the past. Marginal hardwood, large trees have open grown characteristics. Aspen and fir present. On a hillside with multiple seeps flowing into the q-types. Browse evident. |
| 14 | 6128 - Lowland Coniferous, Mixed Deciduous | Poletimber Well | 90.0 | 112 | 111-140 | Open pockets formed by wind throw. Scattered large diameter white pine in eastern portions. Regen very low in east but picks up south and west. Several pockets of dead ash and fir. Northern portions are very wet. |
| 17 | 4136 - Aspen, Mixed Conifer | Poletimber Well | 9.8 | 46 | 51-80 | Transitioning from A3 to A6. Springbrook pathway runs through the stand. |
| 22 | 4199 - Other Mixed Upland Deciduous | Sawtimber Well | 17.9 | 88 | 141-170 | VERY STEEP SLOPES up to 60 %. Evidence of EAB in this stand. Check with Scott Lent to see if there is Oak Wilt confirmed in this stand. |
| 23 | 4130 - Aspen | Sapling Well | 8.2 | 6 | Immature | Cut winter of 2009. Extensive beaver activity in middle of stand, the over story is primarily cherry in this portion. A couple oak were left in stand. |
| 26 | 4119 - Mixed Northern Hardwoods | Sawtimber Well | 159.4 | 93 | 81-110 | Very steep slopes up to 60%. Average BA = 89, some of the Oak are dying out from what appears to be Oak Decline. |
| 27 | 6120 - Lowland Cedar | Poletimber Poor | 26.7 | 91 | 1-50 | Several cascading beaver damns throughout stand-some old some new. Many pockets converting into meadow. Lots of blow down on pockets. Very wet stand. |
| 30 | 4130 - Aspen | Poletimber Well | 6.3 | 33 | 51-80 | Well stocked aspen pole stand. |
| 31 | 4130 - Aspen | Poletimber Well | 11.7 | 33 | 51-80 | Well stocked pole stand. |

| | Level 4 Cover Type | Size Density | Acres | Stand Age | BA Range | General Comments: |
|-----|--|--------------------|-------|--------------|-------------|--|
| 37 | 4110 - Sugar Maple Association | Sawtimber Well | 231.8 | 87 | 81-110 | Selection cut completed on 11/24/2010. Lots of small aspen clearcuts scattered throughout stand of varying ages. Locations of patches noted in the OFS layer. Lots of deer browse. |
| 38 | 4139 - Aspen, Mixed Deciduous | Sawtimber Well | 10.7 | 68 | 81-110 | Too wet to cut. Lots of seeps/streams/low areas with cattails. Next time stand 5 is cut it could be expanded a little bit into the north end of 38 to grab some more aspen. |
| 39 | 4116 - Mixed N. Hardwood - Aspen | Poletimber Well | 34.6 | 36 | 81-110 | some seeps in areas. some of the aspen was cut out of stand in pockets turning it into a two aged stand. no cutting record for the aspen that was removed |
| 40 | 4119 - Mixed Northern Hardwoods | Poletimber Well | 79.1 | 87 | 51-80 | Selection harvest completed in stand 11/24/2010. Very open understory. Some cedar mixed with hardwood along transition into q-type. A few sugar maple seedling 10' or so. Multiple feeder creeks flowing through stand. Walking trail also in stand. |
| 41 | 4111 - S.Maple, Hard Mast Association | Sawtimber Well | 113.3 | 91 | 81-110 | Light thinning for visual management along Slashing Road. Stay back from streams. Look at road for possible re-closure and revegetation. Stand thinned throughout the summer, fall, and winter of 2010. Finished spring 2011, Jaroche Brothers. Average BA = 97 All Ash and Red Oak cut along slashing road right of way 2014. |
| 45 | 4110 - Sugar Maple Association | Sawtimber Well | 64.2 | 92 | 81-110 | OPIC - FMD: Section 33 SWNE. Stand thinned summer, fall, winter 2010 and finished spring 2011, Jaroche Brothers. Average BA = 98 |
| 53 | 6118 - Lowland Deciduous with Cedar | Poletimber Well | 9.0 | 94 | 51-80 | Springbrook tributary runs through this stand. Black Ash beginning to fall apart. |
| 56 | 6123 - Lowland Fir | Poletimber Well | 9.5 | 99 | 111-140 | Nothing in sub-canopy to report. High water table but harvest possibilities exist. Majority of ash dead. |
| 114 | 6120 - Lowland Cedar | Sawtimber Well | 76.9 | 81 | 81-110 | OPIC - FMD: W1/2 section 33 & E1/2 section 32 |
| 122 | 4199 - Other Mixed Upland Deciduous | Sawtimber Well | 18.8 | 88 | 51-80 | Part of stand 22 that was cut last YOE. EAB in the stand. Also Oak Wilt. Very little Oak regen, what is there is of stump sprout origin and has been browsed |

| Stand | Cover Type | Acres | Managed Site | General Comments: |
|-------|------------------------------------|-------|--------------|--|
| 3 | 310 - Herbaceous Openland | 1.8 | No | |
| 6 | 629 - Mixed non-forested wetland | 26.0 | No | Standing dead throughout. Lots of water. Some regen has established. Conifer where real wet but some deciduous in the drier spots. Some beaver activity. |
| 8 | 310 - Herbaceous Openland | 4.0 | No | A popular dispersed camping area. Creek adjacent to stand. Some scattered hwdwd also present. |
| 11 | 3205 - Mixed Upland Shrub | 12.1 | No | Open with pockets of brush. Mostly brush along road and in the south. Some larger hwdws also mixed in. Heavy browse. Lots of activity on hiking trail that meanders through the stand. |
| 13 | 6229 - Mixed lowland shrub | 3.0 | No | Lowland shrubs and grasses. |
| 15 | 310 - Herbaceous Openland | 1.8 | No | Grassy Opening |
| 19 | 122 - Road/Parking Lot | 14.1 | No | Chandler and Slashing Rds |
| 28 | 310 - Herbaceous Openland | 6.3 | No | Power line, ditch, and some portions of road. |
| 47 | 3303 - Mixed Low Density Trees | 39.9 | No | Old hardwood nursery. Could make a case fir 25+% canopy closure (very close) |
| 48 | 790 - Other Bare/Sparsely Vegetate | 5.0 | No | SLASHING ROAD GRAVEL PIT. PIT NO. 004. Dirt and stumps from road county road construction has been placed within stand. This is an active shooting range. Mostly bare soil and knapweed. |
| 142 | 500 - Water | 9.8 | No | Beaver Flooding |
| 401 | 310 - Herbaceous Openland | 11.1 | No | Used to be grazed under a permit. Apple tree and some misc. shrubs present. Knapweed on site. |
| 402 | 3205 - Mixed Upland Shrub | 21.1 | No | Open with pockets of brush. Blackberry in open areas. Heavy browse on ash and maple seedlings. A few spruce in stand. Knapweed present. |
| 404 | 310 - Herbaceous Openland | 2.6 | No | |
| 406 | 310 - Herbaceous Openland | 3.3 | No | |
| 411 | 310 - Herbaceous Openland | 31.1 | No | GRAZING PERMIT. (No longer issued.) |
| 412 | 310 - Herbaceous Openland | 16.5 | No | Powerline Portions are open wetland. |
