Details are not yet available:

- The document/map intended at this location is either temporarily unavailable -or- This file location was developed as we are adding information and features.

- The document you are presently seeing at this location will be replaced with a newer version developed to better serve the reader's needs, contain quality information, and be a more usable product.

- This document will be replaced as soon as possible. Please return later for updates.

- We appreciate your patience as we develop new and better information. Thank you.

The Michigan DNR website – at http://www.michigan.gov/dnr - already provides a wide variety of detailed information: Details include specifics on State land areas, habitat management, information on game and nongame species, and more. Please review these other resources for existing information while this new document is being developed. If you have questions, use the online DNR resources or contact a DNR Operation Service Center using a contact link off the DNR web page at www.michigan.gov/dnr, or a contact phone number from your local phone book.

The Hunting Access Program (HAP) section of the DNR website contains a variety of information, including an overview map of point locations of HAP lands within the State (at http://www.michigan.gov/documents/dnr/HAP_Locations_364373_7.pdf). There are already detailed county-wide map products depicting HAP lands, provided at http://www.michigan.gov/dnr/0,1607,7-153-10371_14793_52946---,00.html .   On these products, you should see a red star symbol representing HAP lands, so you can find the HAP cooperator areas already on these products.

A new interactive online mapping tool exists: Have you tried Mi-HUNT?
Mi-HUNT is the interactive online mapping tool created specifically to help Michigan hunters and outdoor enthusiasts find land details, use DNR resource information to review areas across Michigan, see State public hunting / trapping lands, cooperating private landowner lands like the Hunter Access Program or Commercial Forest lands, and much more.   Within this application, there is an option to display HAP lands as a red star symbol representing those cooperator areas, so you can find the HAP areas already in Mi-HUNT. Why not give Mi-HUNT a try?
