Found no evidence of original corner position. Re-established corner position by first recreating the closing corner between Sections 2 and 3, T43N-R1W, by doubling the distance from the Northwest corner of Section 3 to the North $\frac{1}{4}$ corner of Section 3. Set standard corner at record falling from closing corner (17.82'). County Surveyor notes yield a distance of 2631 feet from the South $\frac{1}{4}$ corner of Section 34 to the Southeast corner of Section 34. Our distance measures 2632.8 feet. This solution leaves a surplus of 41 feet (as compared to County Surveyor notes) in the West ½ of the South line of Section 35.

C. Description of monument for corner and accessories established to perpetuate locating the position of the corner:

(I-13) Corner is a 3/4" x 24" iron with plastic "Chippewa County Remonumentation Corner" Corner falls on the centerline of Townline Road (East-West, paved)
