- Description of corner evidence found and/or method applied in restoring or reestablishing corner:
 - G-9 Corner common to Sections 21, 22, 27 & 28, T18N, R11W, Pinora Tup., Lake Co., Mi.

I found a 4" x 36" Concrete Monument and all the above accessories. This corner is basically at the extension of the centerline of a North and South County Road that curves Westerly approximately 600 feet South of the corner. The distance East to the 1/4 corner common to Sections 22 and 27 is 2752.49 feet and the distance West to the Section corner common to Sections 20, 21, 28 and 29 is 5107.9 feet, indicating that this corner should possibly be 130 feet more or less East of its present location. The G.L.O. survey called for a 14" Pine for the corner, I did not find any remains of a pine tree under the found monument. I did recover a Pine stump 136 feet more or less East of the Monument, but could not find any evidenced to authenticate it as the corner (there are several pine stumps in this area). Without sufficient evidence to disprove the Blass Monument, I accepted it in it's present location.

Description of monument for corner and accessories established to perpetuate locating the position of the corner: G-9 - Corner common to Sections 21, 22, 27 & 28, T18N, R11W, Pinora Twp., Lake Co., Mi.

I accepted the 4" x 36" Concrete Monument as a substantial monument for the corner and is accepted as a careful and faithful re-establishment of the position of the original corner.
