P.A. 345 1990, APPROVED BY LIVINGSTON COUNTY
PEER GROUP ON 8. 28.96, CO. REP JED

SUMMARY

C-11

Northwest Corner, Section 32, T2N-R6E, Brighton Township, Livingston County, Michigan.

Found 3/4" iron pipe at ground surface at the north edge of pond/swamp. No occupation or evidence of other corners present. Over hanging tree limbs will make this corner difficult for G.P.S.

Original sections measured by Sylvester Sibley in May 1823. On Sibley's field notes page 8 this dossier, this surveyor found a pond of about 40 Acres at 51.50 chains. At 80 chains, Sibley's corner is in the North end of pond, no post or bearing tree. Than in 1882, Miles Bullock witnessed Southeast corner of Section 30. This was followed by M.D.O.T. witnesses in 1952. Washtenaw Engineering survey 1972 (page 17-18) has one common witness to M.D.O.T. and subsequent surveys.

Plat of "Brighton CC" 1927 shows this Corner and a distance of 2574 (C-11 to C-12) and a distance of 2682.5 (C-11 to D-11). "Brighton CC Annex" 1948 show same distances and a point set 33 feet South. M.D.O.T. survey (page 13B this dossler) prepared approx. 1959 shows distance C-11 to C-12 as 2574.68 feet.

On October 17, 1961, Lyle Munsell denotes Northeast corner Section 31, with a found iron 33 feet South. Boss Survey 1973 (page 19), found 3/4" pipe at C-11 with a 3/4" Pipe 33 feet South and the platted distance of 2403.49 from C-11 south to Grand River was measured as 2402.05 feet. Atwell-Hicks 1994 survey (page 20-21) measure within 2' of platted distance C-11 to C-12 and matches survey by Boss 1973. Washtenaw Engineering.

On April 5, 1996, Paul Kurtz of Boss Engineering witnesses Northeast corner and also finds 3/4" iron pipe South 32.97 feet.

We therefore conclude that all surveys to North, South, East, and West, refer to the same location as monumented. We recommend approval of corner as found.
