1981: An LCRC recorded by Stuart A. Lakanen RLS #21573, in L. 4, RC Pages 84 & 84A, indicates the corner as a found 1 1/4" Steel Axle, protruding about 12" above ground. This axle is at the intersection of a fence running West and a fence running North-Northeast. Lakanen first saw this monument in 1954 when he and his father witnessed it to a 1/2" iron pipe driven in at the base of a White Pine tree. Blazed lines run to the East and West of the Axle, and the entire boundary of the forty, as they recognize it, has evidence of old fence lines. The Steel Axle was pointed out to Lakanen's father by Walfred Prusi as being the corner of the property as long as Walfred could remember. Walfred Prusi, now deceased, was the second generation of the family to live on the farm and was born there in 1910. The East-West fence line, about 160' North of this corner, was installed by Lakanen and his father during the 1950's to control cattle. Old fence posts and wire were used in this construction. Established references:
