Description of corner evidence found and/or method applied in restoring or reestablishing corner: We found a 4 inch diameter iron pipe on the South shoulder of an East - West County Road. We checked the distance from this corner South to the monumented center quarter corner of Section 15 (H-6) as recorded in L.C.R.C. No. 88, and to the NE Corner of Section 15 (1-5). We found these measurements to match with those recorded in L.C.R.C. No. 83, and to the NE Corner of Section 15 (1-5). We found these measurements to match with those recorded in Certified Survey No. 373, and with those recorded in the Albert Hass Survey from November 14 - 15, 1900. Since this corner was set from an original government B.T. by Albert Hass in 1900, and since Wilson's retracement matches very precisely with Hass's record measurements, we accepted this corner as a careful and faithful perpetuation of the position of the original corner. C. Description of monument for corner and accessories established to perpetuate locating the position of the corner. C. Description of monument for corner and accessories established to perpetuate locating the position of the corner. 10 dia. Tamarack N44°E 79.95 feet Scr. NBT 10 dia.
