We have received a corner record from you for which the description of corner reads as follows: "Section corner common to Sections 5, 6, 31, and 32." This corner was set on the town line between Missaukee and Kalkaska County, T24N, R7W, and T25N, R7W. The date of establishment was March 28, 1966.

The map on this corner record indicates that the west 1/4 corner of Section 5 was instead established. I assume that this was a typographical error and that the described section corner was indeed established.

Please advise.

Gordon Terry

GT:sl

Gordon:

The corner description is correct. Would you please change the corner location on the map to the NW corner of section 5. I will make the corrections on the other copies which are still in this office. Thanks.

K.S.O.
