nd ks southerly corner had a PK found by the City of Troy and witnessed as C-2 per L.C.R.C. L. 13497 P. 394. It appears that the North corner is the same as recorded in L.C.R.C. L. 6980 P. 829 but cannot confirm as all but one witness is gone and the one remaining witness does not check by \pm 2'. Calculated government pro. from C-2 to C-1 = 3300.5' and C-2 to C-3 = 2580.0' which checks neither corner. The northerly corner is 54.5' South and the Southerly corner is 99.4' South. The earliest survey found showing this corner was prepared by Mason L. Brown & Son, Inc., dated October 21, 1967. The Southerly of these two corners checks said Brown Survey. The measurement North to C-1 is within 0.04'. Recommend holding the Southerly point as C-2.
