I found a 1" sq. Iron 2" below the surface of a E-W gravel road; an old barb wire fence runs to the south. On excavation and removal, I found at 10" deep a figure-8 iron hook, approximately 3/8" dia. and 3"x5". On further excavation to 18", I found charcoal per description by Hawley, 1883. The 1" sq Iron was found to be on the north side and uptight against a well-preserved pointed cedar stake about 2"x14" long and lots of charcoal, but no brick or crockery. Corner is substantially as described by Hawley & Salisbury, 1907. All Ochs, 1975, witnesses are standing and measure good. This Iron riser, cedar stake and charcoal was accepted as the best evidence of the corner and was accepted as being a careful and faithful perpetuation of the original corner. No evidence is known to me that would lead me to believe that the corner should be in another location. The iron was driven down and I placed a 4"x20" Harrison Cast Iron Monument, stamped "County Surveyor" & "26457" above at the found position. C. Description of monument for corner and accessories established to perpetuate locating the position of the corner.
